STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

The Register is arranged in the following six sections:

- (a) PREPROPOSAL-includes the Preproposal Statement of Inquiry that will be used to solicit public comments on a general area of proposed rule making before the agency files a formal notice.
- (b) **PROPOSED**-includes the full text of formal proposals, continuances, supplemental notices, and withdrawals.
- (c) **PERMANENT**-includes the full text of permanently adopted rules.
- (d) EMERGENCY-includes the full text of emergency rules and rescissions.
- (e) MISCELLANEOUS-includes notice of public meetings of state agencies, rules coordinator notifications, summaries of attorney general opinions, executive orders and emergency declarations of the governor, rules of the state Supreme Court, and other miscellaneous documents filed with the code reviser's office under RCW 34.08.020 and 42.30.075.
- (f) TABLE-includes a cumulative table of the WAC sections that are affected in the current year.
- (g) INDEX-includes a combined subject matter and agency index.

Documents are arranged within each section of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence with a section's material.

2. PRINTING STYLE—INDICATION OF NEW OR DELETED MATERIAL

RCW 34.05.395 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined material is new material;
 - (ii) deleted material is ((lined out between double parentheses));
- (b) Complete new sections are prefaced by the heading <u>NEW SECTION</u>;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading REPEALER.

MISCELLANEOUS MATERIAL NOT FILED UNDER THE ADMINISTRATIVE PROCEDURE ACT

Material contained in the Register other than rule-making actions taken under the APA (chapter 34.05 RCW) does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

4. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules normally take effect thirty-one days after the rules and the agency order adopting them are filed with the code reviser's office. This effective date may be delayed or advanced and such an effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser's office unless a later date is provided by the agency. They remain effective for a maximum of one hundred twenty days from the date of filing.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

5. EDITORIAL CORRECTIONS

Material inserted by the code reviser's office for purposes of clarification or correction or to show the source or history of a document is enclosed in [brackets].

REGULATORY FAIRNESS ACT

The Regulatory Fairness Act, chapter 19.85 RCW, was enacted in 1982 to minimize the impact of state regulations on small business. Amended in 1994, the act requires a small business economic impact analysis of proposed rules that impose more than a minor cost on twenty percent of the businesses in all industries, or ten percent of the businesses in any one industry. The Regulatory Fairness Act defines industry as businesses within a four digit SIC classification, and for the purpose of this act, small business is defined by RCW 19.85.020 as "any business entity, including a sole proprietorship, corporation, partnership, or other legal entity, that is owned and operated independently from all other businesses, that has the purpose of making a profit, and that has fifty or fewer employees."

Small Business Economic Impact Statements (SBEIS)

A small business economic impact statement (SBEIS) must be prepared by state agencies when a proposed rule meets the above criteria. Chapter 19.85 RCW requires the Washington State Business Assistance Center (BAC) to develop guidelines for agencies to use in determining whether the impact of a rule is more than minor and to provide technical assistance to agencies in developing a SBEIS. All permanent rules adopted under the Administrative Procedure Act, chapter 34.05 RCW, must be reviewed to determine if the requirements of the Regulatory Fairness Act apply; if an SBEIS is required it must be completed before permanent rules are filed with the Office of the Code Reviser.

Mitigation

In addition to completing the economic impact analysis for proposed rules, state agencies must take reasonable, legal, and feasible steps to reduce or mitigate the impact of rules on small businesses when there is a disproportionate impact on small versus large business. State agencies are encouraged to reduce the economic impact of rules on small businesses when possible and when such steps are in keeping with the stated intent of the statute(s) being implemented by proposed rules. Since 1994, small business economic impact statements must contain a list of the mitigation steps taken, or reasonable justification for not taking steps to reduce the impact of rules on small businesses.

When is an SBEIS Required?

When:

The proposed rule has more than a minor (as defined by the BAC) economic impact on businesses in more than twenty percent of all industries or more than ten percent of any one industry.

When is an SBEIS Not Required?

When:

The rule is proposed only to comply or conform with a federal law or regulation, and the state has no discretion in how the rule is implemented;

There is less than minor economic impact on business;

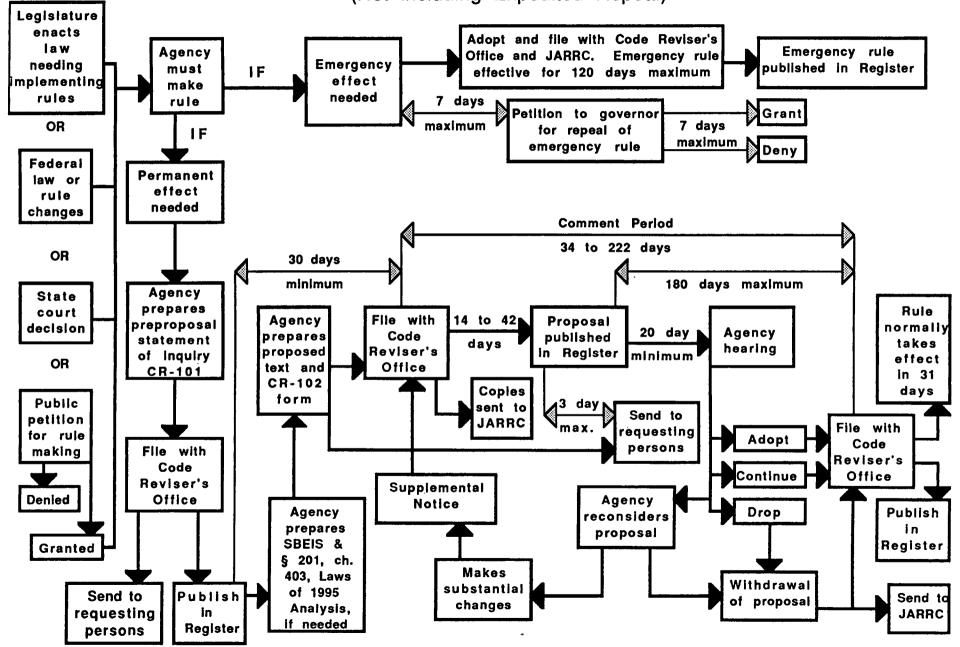

The rule REDUCES costs to business (although an SBEIS may be a useful tool for demonstrating this reduced impact);

The rule is adopted as an emergency rule, although an SBEIS may be required when an emergency rule is proposed for adoption as a permanent rule; or

The rule is pure restatement of state statute.

AMENDATORY SECTION (Amending Order FM 82-10, filed 11/2/82)

WAC 212-17-215 Retailers of fireworks—Disposition of unsold stock. All retail fireworks licensees shall return unsold fireworks stocks either to the wholesaler, from whom they were purchased, for safe storage, or store them in a place and in a manner approved by the fire authority having jurisdiction not later than the thirty-first of July of each year for the fourth of July selling season, or no later than January thirty-first of each year for the New Year's Eve selling season.

NEW SECTION

WAC 212-17-21501 General provisions. (1) The state of Washington hereby fully occupies the entire field of regulation of all matters relating to the operation of retail fireworks structures and associated temporary fireworks storage structures including, but not limited to licensing and permitting procedures, transportation to and from these facilities, location, areas within twenty feet around these structures, the structures themselves, operation of these structures, temporary storage associated with retail fireworks sales and operation of these temporary storage structures, clean-up after the end of legal selling periods and all other related matters.

(2) The state of Washington hereby preempts all city and county ordinances, rules, regulations, procedures or policies with respect to all such matters. These rules constitute the entire and exclusive authority for regulations of all matters relating to operation of retail fireworks structures and associated temporary fireworks structures. No city or county may enact or enforce any other requirements. These rules do not limit nor preempt the authority of a city or county to prohibit or restrict to a degree greater than state standards, the sale, purchase, possession and use of common fireworks, UN 0336 1.4G. Subject to the limitations imposed by chapter 70.77 RCW, a city or county may ban fireworks; or a city or county may restrict the days of sale, purchase, possession and use of fireworks; or a city or county may restrict the types of fireworks that may be sold and purchased. But, if a city or county allows the sale of fireworks classified as common fireworks, UN 0336 1.4G, these rules preempt that city's or that county's authority to enact or enforce standards of operation for the retail fireworks structures and the temporary fireworks storage

structure which are different from the standards established by these rules.

- (3) Retail fireworks structures, temporary fireworks storage structures and the related matters covered by these rules are exempt from the Uniform Building Code, the Uniform Fire Code and other codes which would, if in effect, conflict with the standards and regulations specified herein except when these rules specifically require compliance with specific and thereby limited provisions of those codes. However, if a city or county ordinance which regulates the sale, purchase, possession and use of fireworks is a part of that city's or that county's building code or fire code, those portions of that city's or that county's building code or fire code which are not in conflict with these rules are not preempted or affected by these rules.
- (4) Each retail fireworks structure is required to have a license issued by the state fire marshal and a permit issued by the city or county which has jurisdiction. Each license and each permit is valid for a period of one year.
- (5) If all requirements of these rules are met, a license or a permit once issued is transferable between agreeing parties. If all requirements of these rules are met, the location of the retail fireworks structure or the location of the associated temporary fireworks storage structure or other conditions or information associated with the license or permit can be changed after the issuance of the license or the issuance of the permit at any time prior to the beginning of the legal sales period. The state fire marshal shall, at no additional cost, make note of the changes. The city or county which has jurisdiction shall, at no additional cost, within five business days confirm compliance with these rules and make note of the change.
- (6) The license and the permit shall be posted in the retail fireworks structure.
- (7) Only Class C common fireworks, UN 0336 1.4G, obtained from state-licensed wholesalers, not otherwise prohibited by chapter 70.77 RCW or local ordinance, and holiday related products incidental but related to these products, may be sold in retail fireworks structures.
- (8) A list of fireworks that may be sold to the public, as furnished by the state fire marshal, must be posted at each retail fireworks structure.
- (9) Except as limited by an ordinance of a city or a county, fireworks can be sold from 12:00 noon on June the 28th through 12:00 noon on July the 6th. Fireworks may not be sold between the hours of 11:00 p.m. and 9:00 a.m. from June the 28th through July the 3rd. Fireworks may not be sold from 12:00 midnight on July the 4th through 9:00 a.m. on July the 5th. Fireworks may not be sold from 11:00 p.m. on July the 5th through 9:00 a.m. on July the 6th.
- (10) Except as limited by an ordinance of a city or a county, fireworks can be sold from 6:00 p.m. on December the 31st through 1:00 a.m. on January the 1st of the subsequent year.
- (11) Licensees shall familiarize all persons working in the retail fireworks structure with all of these requirements.

WSR 96-12-080 PREPROPOSAL STATEMENT OF INQUIRY DEPARTMENT OF ECOLOGY

[Order 96-01—Filed June 5, 1996, 9:51 a.m.]

Subject of Possible Rule Making: New source review program for new sources of air emissions, chapter 173-400 WAC.

Statutes Authorizing the Agency to Adopt Rules on this Subject: Chapter 70.94 RCW.

Reasons Why Rules on this Subject may be Needed and What They Might Accomplish: The present new source review program is unclear in how small emission sources are to be treated. Further, ecology and stakeholders have found that the new source review program in general could be clarified and streamlined. The intent of this rule making is to define what units are de minimis (as required by SSB 6466) and to clarify and streamline the new source review process.

Other Federal and State Agencies that Regulate this Subject and the Process Coordinating the Rule with These Agencies: The EPA and local air authorities also regulate new sources of air emissions. The EPA only regulates major sources and has delegated its program to ecology. Local authorities have responsibility for minor new source review in their jurisdiction. Ecology has an external committee providing advice on changes to the new source review program. EPA and several local authorities are represented on that committee. Ecology is in close contact with the other local authorities. These rule changes will apply statewide unless a local authority adopts its own rule.

Process for Developing New Rule: Agency study.

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication. Those interested in participating in this rule making should contact Tony Warfield, Department of Ecology, Air Quality Program, P.O. WSR 96-12-005 PROPOSED RULES TACOMA COMMUNITY COLLEGE

[Filed May 23, 1996, 11:05 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 96-09-050A.

Title of Rule: Confidentiality of student records.

Purpose: Revisions to existing policy.

BACKGROUND: In 1995 there were substantial changes in the published guidelines for postsecondary institutions for implementation of the Family Educational Records and Privacy Act (FERPA). A review of these guidelines pointed out several areas in which our TCC WAC was inadequate or in need of revision.

Under WAC 132V-15-020(4), directory information, we are currently restrained from releasing information that most students would want released. For example, if a potential employer calls to confirm a student received a degree at the college, we are prohibited from releasing this information; our commencement program currently puts us out of compliance with our restrictive definition; to release names of honor students for publication in The Challenge, we had to call every student. The restrictiveness of our current WAC is very burdensome for the staff and does not adequately serve our students' interests.

Under WAC 132V-15-020 (6)(b), the educational records definition is too broad and does not clearly identify the exemptions for certain personal staff notes, security, employee, medical/counseling and alumni records. By clearly defining these exceptions we reduce the likelihood of inappropriate records searches.

Under WAC 132V-15-030 Type—Location—Responsibility of records, there were numerous revisions due to administrative office restructuring. The business office was not identified in the existing WAC for fee collection records.

Under WAC 132V-15-090 Third party access to records—External, changes were made to address a 1994 amendment to FERPA relating to grand jury/law enforcement subpoena and the Crime Awareness and Security Act.

RECOMMENDATIONS: Broaden directory information to include student name, degrees and awards received, and permit confirmation of dates of attendance, date of birth, major field of study, participation in officially recognized sports and activities, and the most recent previous educational institution attended.

Add an exclusion clause to the educational records section for those records not covered under FERPA.

Update the type/location/responsibility of records section to reflect current administrative structure.

Add item relating to release of information to state and local officials which is overlooked in the original WAC.

Add items relating to victim of crime obtaining access to disciplinary results.

Add provisions to cover public release of directory information.

Other minor changes are recommended to improve the clarity of the policy.

BACKGROUND: Chapter 132V-24 WAC, Public records, contains outdated information regarding when and where the board of trustees meet.

Set copy charge according to TCC board policy.

Update building location for public records to Building 13.

Statutory Authority for Adoption: Chapter 1, Laws of 1973 (Initiative 276) Disclosure—Campaign finances—Lobbying—Records; and in particular, sections 25-32 of that act, dealing with public records.

WSR 96-12-018 PROPOSED RULES DEPARTMENT OF FINANCIAL INSTITUTIONS

(Securities Division)
[Filed May 29, 1996, 2:34 p.m.]

Supplemental Notice to WSR 96-07-059.

Preproposal statement of inquiry was filed as WSR 96-03-117.

Title of Rule: Limited registration of Canadian broker-dealers.

Purpose: To recognize a simplified procedure for registration of Canadian broker-dealers or agents for the limited purposes of accomplishing trades with preexisting customers.

Statutory Authority for Adoption: RCW 21.20.450. Statute Being Implemented: RCW 21.20.040.

Summary: Two alternative proposals were published in WSR 96-07-059 concerning registration and exclusion provisions promulgated by the North American Securities Administrators Association regarding a simplified procedure for Canadian broker-dealers to conduct business with existing clients. These proposals were developed by a NASAA committee which was made up of state regulators and circulated to all states, industry, and the federal Securities and Exchange Commission for comment. The state of Washington Securities Division, after hearing and consideration of the two proposals, has determined to file a supplemental notice to propose a modified version of the NASAA exclusion version for the broker-dealers conducting such limited activity.

Name of Agency Personnel Responsible for Drafting: Brad Ferber, 210 11th Avenue S.W., 3rd Floor West, (360) 902-8760; Implementation: John L. Bley, 210 11th Avenue S.W., 3rd Floor West, (360) 902-8700; and Enforcement: Deborah R. Bortner, 210 11th Avenue S.W., 3rd Floor West, (360) 902-8760.

Name of Proponent: Department of Financial Institutions, Securities Division, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Two alternative proposals were put forth by the North American Securities Administrators Association regarding a simplified procedure to allow Canadian brokerdealers to conduct business with certain clients without full registration. Drafts were developed by a NASAA committee

made up of state regulators and were circulated to all states, industry, and the federal Securities and Exchange Commission for comment. The state of Washington is considering adoption of a modified version of one of these alternative proposals as a means of allowing such activity by eligible Canadian broker-dealers.

Proposal Changes the Following Existing Rules: The state of Washington Securities Division, after consideration of the two NASAA proposals, has determined to propose a modified version of the NASAA exclusion version for the broker-dealers conducting limited activity in the state.

No small business economic impact statement has been prepared under chapter 19.85 RCW. The changes are anticipated to have no economic impact and will be beneficial to Canadian broker-dealers who conduct limited activity for existing clients.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The Department of Financial Institutions is not among the agencies identified in the legislation and the agency has not applied it to this rule making.

Hearing Location: Third Floor West Conference Room, General Administration Building, 210 11th Avenue S.W., Room 300, Olympia, WA 98504, on July 11, 1996, at 2:00 p.m.

WSR 96-12-023 PROPOSED RULES DEPARTMENT OF ECOLOGY

[Order 95-11-Filed May 29, 1996, 4:47 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 98-18-075 [95-18-075].

Title of Rule: Motor vehicle emission inspection, chapter 173-422 WAC.

Purpose: Increase the emission reduction achieved by the emission check program to ensure maintenance of the national air quality standard for ozone in the Vancouver/Portland area. Allows these changes to be used in other areas if needed.

Statutory Authority for Adoption: Chapter 70.120 RCW

Statute Being Implemented: Chapter 70.120 RCW.

Summary: Adds new inspection procedures and expands Clark County test area.

Reasons Supporting Proposal: Additional emission reductions needed in Clark County and may be in other areas.

Name of Agency Personnel Responsible for Drafting: John Raymond, P.O. Box 47600, Olympia, WA 98504-7600, (360) 407-6856; Implementation and Enforcement: Joe Williams, P.O. Box 47600, Olympia, WA 98504-7600, (360) 407-6880.

Name of Proponent: Department of Ecology, Air Quality Program, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: The rule regarding motor vehicle emission inspection needs to be revised to obtain additional emission reduction in Clark County and in other areas if needed. Additional vehicle owners in Clark County will be required to be tested and the testing procedures revised.

Proposal Changes the Following Existing Rules: Describe changes: Requires additional vehicle owners in Clark County to be tested and revises test procedures. Inspection procedures are revised to add an acceleration simulation mode (ASM) test, leaking gas cap test, and a check of the on-board diagnostic systems on 1996 and newer vehicles.

A small business economic impact statement has been prepared under chapter 19.85 RCW.

The Regulatory Fairness Act, chapter 19.85 RCW, requires that rule-making proposals be assessed for disproportionate impacts upon small versus large businesses, and that any such found be mitigated if feasible or legal under the statute being implemented. This document summarizes the above referenced proposed rule amendments in light of that requirement.

Background

The essential features of the proposed rule amendments include:

- including a motor vehicle inspection technique known as the acceleration simulation mode (ASM) in the rule as an option to be required in noncompliance areas and emission contributing areas if needed to aid in attaining air quality standards or as part of air quality maintenance plans;
- inclusion of gasoline filler cap leak checking on 1971 or newer model year vehicles for the same reasons;
- verification that on-board diagnostic systems on 1996 and newer vehicles so equipped show that all emission-related functional checks have been completed with no malfunctions detected; and
- expansion of emission contributing areas in the Vancouver, Washington region as required in RCW 70.120.150 (Motor Vehicle Emission Control).

Other pertinent features of the rule, including biennial inspection, inspection fees, repair cost waiver limits, etc. remain the same as at present. The remainder of this analysis will focus primarily upon the implications of exercising the ASM option. The other items on the list carry little or no cost impacts, can usually be accomplished in

conjunction with a motor vehicle inspection, or cannot be readily assessed with available information.

Analysis of Impacts

a) Affected industries.

Although the bulk of the vehicles affected by these proposed rule amendments will be privately owned personal use vehicles, firms in many businesses and industries can, and do, operate motor vehicles in conjunction with their activities. A complete listing of the sectors involved is not possible. However, some appreciation of the scope of potential impacts may be gained from examination of the businesses that have been granted ecology approval to conduct inspections on their own fleet vehicles or to retain an independent testing or automotive service to do so. A list of these vehicle owners was obtained and assigned to appropriate SIC categories to the extent possible. The resulting listing is shown below.

*Information displayed at 3-digit SIC level to avoid disclosure of potentially confidential information.

Note that in some cases, especially the last four SICs, the above include businesses engaged in providing emission testing and/or repair services to owners of fleet vehicles. Presumably, some firms in all of these sectors (and others) use centralized test stations for vehicle inspections and would be affected by exercise of the ASM option, as described further in the discussion of mitigation measures.

b) Small versus large business impacts.

Additional costs associated with utilization of the ASM inspection procedure (as well as gasoline filler cap inspection) would be incurred on a per vehicle basis. It is reasonable to infer that, in any business or industry, the number of vehicles operated would be directly related to the size of the individual firm, whether characterized by employment, revenues or some other measure. Thus, one would expect that impacts upon small businesses would be proportional to those upon large businesses. In any case, presently estimated impacts per vehicle are not large, as described below.

c) Per vehicle cost impacts - description.

Persons and firms subject to either the current inspection and maintenance program or to the ASM option incur three kinds of costs. These include:

- · charges or initial emission testing;
- repair costs for those vehicles that fail an initial test; and
- inconvenience costs, i.e., the value of the time required for initial testing and — for owners/operators of vehicles failing initial testing the time required to obtain repairs and to retest the vehicles.

In addition, owners/operators of vehicles that are successfully repaired enjoy an offsetting gain in fuel economy. Thus, the net cost of implementing the ASM option equals the sum of the three items listed above less the value of fuel economy gains compared with the same items for current inspection and maintenance procedures.

d) Per vehicle cost impacts - estimates.

Results obtained from an Environmental Protection Agency developed (and mandated) model for analyzing inspection and maintenance programs were combined with other information collected by ecology to assess this net cost for three types of motor vehicles; heavy duty gasoline vehicles, light duty gasoline vehicles with model years of 1980 and earlier, and light duty gasoline vehicles with model years 1981 and later. Current costs were inflated to year 2000 levels (chosen as a reasonable point by which to anticipate ASM implementation) at a rate of three percent per year.

Initial testing costs and the value of the associated time would be incurred by owner/operators of all vehicles subject to inspection and maintenance programs. Out of pocket and inconvenience costs would be incurred only in those cases where vehicles failed an initial test and required repair and retesting. In order to put these on a common footing, costs associated with repairs and retesting were weighted by the probability of a vehicle of each of the three types noted

above failing an initial test. The results represent <u>expected</u> costs per vehicle per year.

As it happens, all of the relevant parameters associated with the first two vehicle types (heavy duty gasoline vehicles and light duty gasoline vehicles with model years of 1980 and earlier) have the same values. Thus, there appear to be no incremental costs associated with ASM for these vehicles. However, ASM appears to more successfully detect vehicles in the third group, light duty gasoline vehicles with model years 1981 and later, that would benefit from repairs and to more completely identify the extent of needed repairs than does current inspection and maintenance procedure. Further, and as a result, vehicles in this category also gain greater improvements in gasoline milage with ASM than with current procedures.

The estimated monetary values of these impacts, spread across all inspected vehicles in this class as expected annual values per vehicle, are \$5/year for repairs and \$2/year for time associated with repairs, with an improved fuel economy offset of \$2/year. The net result of \$5 per vehicle per year is not large.

Impacts on Sales or Revenues

As noted previously, no cost increases are associated with ASM implementation for heavy duty gasoline vehicles. Privately owned vehicles of this type are likely to be owned by business firms. The estimated costs for light duty gasoline vehicles with model years 1981 and later shown above are likely to impact businesses owning/operating light vans/trucks or cars — especially those using centralized test stations for vehicle emission inspections. However, at the levels shown above, effects on sales or revenues should not be significant.

Mitigation

In the absence of disproportionate impacts upon small versus large businesses, explicit mitigation would not ordinarily be required. However, two features of the proposed rule amendments have mitigative impacts. First, the requirement for inspection and repair or waiver of vehicles being registered to a new owner, newly licensed, or relicensed is eliminated if it would result in more than one inspection during the same licensing period. Second, although not made explicit in the rule, it is the current intent of the Department of Ecology that, if ASM is implemented, it would be required only at central test stations. Thus, vehicle owners/operators that test their own fleets and automotive service firms that provide testing for fleet owners would be allowed to continue using current procedures. This is potentially mitigative in that it reduces the need for investment in new capital equipment and retraining of personnel.

Involvement of the Small Business Community

The proposed rule amendments specify that neither ASM nor gasoline filler cap testing may be implemented without public hearings and other input. This will provide affected small business owners/operators, and others, opportunity for involvement in decisions to implement either of these.

Section 201, chapter 403, Laws of 1995, applies to this rule adoption. Establishes new conditions that must be met before a vehicle can be relicensed.

AMENDATORY SECTION (Amending Order 93-35, filed 2/28/95, effective 3/31/95)

WAC 173-422-030 Vehicle emission inspection requirement. All motor vehicles, not specifically exempted by WAC 173-422-170, which are registered or reregistered within the boundaries of an emission contributing area, as specified in WAC 173-422-050, are subject to the vehicle emission inspection requirements of this chapter. In addition, the department may require an emission inspection of a motor vehicle, except military tactical vehicles, operated for more than sixty days a year on a federal installation located within an emission contributing area, or a vehicle garaged at a location within an emission contributing area, or a vehicle which has previously passed an emission inspection but has been identified using on road testing as likely to no longer comply with the inspection standards. Neither the department of licensing nor its agents may change the registered owner or may issue or renew a motor vehicle license for any vehicle registered in an emission contributing area, as that area is established under RCW 70,120,150, unless the application for issuance or renewal is: (1) Accompanied by a valid certificate of compliance issued pursuant to RCW 70.120.080 or 70.120.170 or a valid certificate of acceptance issued pursuant to RCW 70,120.070; or (2) exempted from this requirement pursuant to RCW 46.16.015(2). The certificates must have a date of validation which is within six months of the date of application for the vehicle license, license renewal or registered owner change, unless more than one emission inspection would be required during the same license period. Certificates for fleet or owner tested vehicles may have a date of validation which is within twelve months of the assigned license renewal date.

AMENDATORY SECTION (Amending Order 93-35, filed 2/28/95, effective 3/31/95)

WAC 173-422-060 Gasoline vehicle emission standards. Gasoline motor vehicles subject to this chapter shall:

(1) When tested using the exhaust emission testing procedures described in (II) Two Speed Idle Test or (III) Loaded Test of Appendix B Test Procedures of Subpart S-Inspection/Maintenance Program Requirements of Part 51 of Chapter 1, Title 40 of the Code of Federal Regulations adopted November 1, 1992, meet the applicable exhaust emission standards from the following table during both the idle and higher speed mode prior to receiving a certificate of compliance.

(2) When tested using the acceleration simulation mode (ASM) procedure specified in WAC 173-422-070 meet the following standards during that mode and the applicable standard from WAC 173-422-060(1) during the idle mode to receive a certificate of compliance. ASM testing will not start in a region until ecology has considered all comments on the need for ASM testing obtained at a public hearing held in that region.

Compliance with the NOx standards will not be required of vehicles tested in a region until the following conditions are met:

- (a) Ecology has determined that a reduction of NOx emissions in that region will assist in attaining or maintaining the national air quality standard for ozone.
- (b) Ecology has considered all comments received at a public hearing held in that region.
- (c) For at least twenty-four months prior, the vehicle emission test reports have included the NOx reading.

AMENDATORY SECTION (Amending Order 93-35, filed 2/28/95, effective 3/31/95)

WAC 173-422-070 Gasoline vehicle exhaust emission testing procedures. All persons certified by, or under contract to, the department to conduct motor vehicle emission inspections shall use the exhaust emission testing procedures described in (II) Two Speed Idle Test; or (III) Loaded Test of Appendix B-Test Procedures of Subpart S-Inspection/Maintenance Program Requirements of Part 51 of chapter 1, Title 40 of the Code of Federal Regulations adopted November 1, 1992, ((unless)) except that the department may require that the following Acceleration Simulation Mode (ASM) test procedure replace the cruise mode of the loaded test. Equivalent procedures ((have been)) may be approved by the department.

Variations to the procedures specified may be established by the department for all or certain vehicles. Vehicles, not repaired as required by an emission recall for which owner notification was attempted after January 1, 1995, shall not be inspected until compliance with the recall is established.

Acceleration Simulation Mode (ASM)

- 1. Dynamometer Load: Set dynamometer horsepower load equal to [Vehicle Weight (lbs.) + 300]/300. An Environmental Protection Agency specified loading may also be used.
- 2. Vehicle Gear Selection: Vehicles with automatic transmissions use Drive (not Overdrive), vehicles with manual transmissions use second gear unless the engine speed exceeds 2500 revolutions per minute (measured by the vehicle's tachometer or by an evaluation of the vehicle's sound) then use third gear.
- 3. Vehicle Speed: Set vehicle speed at 25 miles per hour (mph) 1.5± mph.
- 4. Pass or Fail Determinations: Once the vehicle has been operating at 25 mph for 15 seconds, begin measuring exhaust HC, CO, CO2, and NOx each second. The reading for pass or fail determinations is the running average of five measurements. When a final pass or fail determination is made, this mode will be stopped and the final readings recorded.
- 5. Fast Pass (HC, CO): When NOx is not measured, the vehicle will pass after 15 or more seconds of measurements if: Both HC and CO readings are passing, and three successive one second measurements are equal to or less than the HC and CO standards and are within 20 ppm HC and 0.20% CO of each other.
- 6. Fast Pass (HC, CO, NOx): When NOx is measured, the vehicle will pass after 45 or more seconds of measurements if the HC, CO and NOx readings are equal to or less than the standards.
- 7. Fast Fail: The vehicle will fail after 15 or more seconds of measurements when: HC reading exceeds 1800 ppm, or the CO reading exceeds 9.0 percent.
- 8. Full Term Pass/Fail: The vehicle will pass or fail after 90 seconds of measurements unless emission readings are declining at a rate that indicates that failing vehicle will pass

within the next 30 seconds. Then up to an additional 30 seconds of measurements will be taken before the vehicle fails.

AMENDATORY SECTION (Amending Order 93-35, filed 2/28/95, effective 3/31/95)

WAC 173-422-170 Exemptions. The following motor vehicles are exempt from the inspection requirement:

- (1) Vehicles proportionally registered pursuant to chapter 46.85 RCW.
 - (2) Vehicles whose model year is 1967 or earlier.
- (3) New motor vehicles whose equitable or legal title has never been transferred to a person who in good faith purchases the vehicle for purposes other than resale; this does not exempt motor vehicles that are or have been leased.
- (4) Motor vehicles that use propulsion units powered exclusively by electricity.

- (12) Motor vehicles fueled by propane, compressed natural gas, or liquid petroleum gas and so registered by the department of licensing.
- (13) Motor vehicles whose manufacturer or engine manufacturer provides information that the vehicle cannot meet emission standards because of its design. In lieu of exempting these vehicles, alternative standards and or inspection procedures may be established.
- (14) Motor vehicles whose registered ownership is being transferred between parents, siblings, grandparents, grand-children, spouse or present co-owners and all transfers to the legal owner or a public agency.
- (15) To ensure a biennial inspection of vehicles registered in the emission contributing areas, motor vehicles with model year matching (even to even, odd to odd) the expiration year of the license being purchased. This exemption does not apply to vehicles being inspected because the registered owner is being changed. However, only one emission inspection is required during the same license period.
- (16) When the model year of the vehicle is the same as or greater than the year in which the vehicle's license expires.

AMENDATORY SECTION (Amending Order 93-35, filed 2/28/95, effective 3/31/95)

Statute Being Implemented: RCW 42.16.010(1) and 42.16.017.

Summary: This proposed rule making amends WAC 82-50-021 by establishing pay dates for state officers and employees for calendar year 1997 and removing now obsolete paydates for calendar year 1995.

Name of Agency Personnel Responsible for Drafting: Millie Lund, 406 Legion Way S.E., (360) 664-3419; Implementation: Sol Davis, 406 Legion Way S.E., (360) 664-3420; and Enforcement: Pete Anthony, 406 Legion Way S.E., (360) 664-3404.

Name of Proponent: Office of Financial Management, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 82-50-021 exists to publish the official lagged, semi-monthly pay dates for state officers and employees. This section of WAC, which provides pay dates for the current and ensuing calendar years, is amended each year to add pay dates for the ensuing calendar year and delete the obsolete pay dates for the previous year.

Proposal Changes the Following Existing Rules: Official lagged, semi-monthly pay dates for calendar year 1997 are added and the now obsolete pay dates for calendar year 1995 are deleted.

No small business economic impact statement has been prepared under chapter 19.85 RCW. This WAC establishes pay dates for state officers and employees, and has no affect on small businesses in the state of Washington. The information provided in this rule may be used by businesses that chose to include state pay dates in calendars that they publish: Any economic impact on those businesses, as an indirect result of publishing these dates, should be positive.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. This amendatory rule-making action is required by statute.

Hearing Location: 1st Floor Conference Room, 406 Legion Way S.E., Olympia, on July 9, 1996, at 9:00 a.m.

WSR 96-12-065 PROPOSED RULES INTERAGENCY COMMITTEE FOR OUTDOOR RECREATION

[Filed June 3, 1996, 3:45 p.m.]

Supplemental Notice to WSR 96-11-112.

Exempt from preproposal statement of inquiry under RCW 34.05.310(4).

Title of Rule: Retroactive development costs—for all projects.

Purpose: In WSR 96-11-112, the Interagency Committee for Outdoor Recreation proposes to make permanent an emergency rule adopted May 14, 1996, in respect to eligibility of certain projects on LEAP Capital Doc. No. 5 for waiver-of-retroactivity for development costs. Public input suggests there may be interest in making all future IAC-funded development projects eligible for waiver-of-retroactivity consideration. This supplemental filing is intended to alert interested parties of the possibility that the proposed waiver-of-retroactivity change could be considered for adoption in respect to all future development projects, not only those identified in the original WSR 96-11-112 filing.

Statutory Authority for Adoption: RCW 43.98A.060(1), 43.98A.070(5), 43.99.080(2), 46.09.240(1).

Summary: Under WSR 96-11-112, the proposed amendment to the existing rule would be limited to a year's duration, and apply only to a small group of IAC-funded projects. If a limiting phrase and sentence are removed from the proposed new text, the proposed rule would be applicable to all development projects. The limiting phrase is: "solely in respect to WWRP projects on LEAP Capital Document No. 5," and the limiting sentence is: "This authority shall be effective until the execution of a project agreement or June 30, 1997, whichever occurs first."

Reasons Supporting Proposal: In addition to those stated in WSR 96-11-112, constituents have suggested the Interagency Committee for Outdoor Recreation consider a broader scope of possible change, which may be beneficial to the efficient use of limited public funds available for the development of recreational facilities.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Laura Eckert Johnson, P.O. Box 40917, Olympia, WA 98504, (360) 902-3000.

Name of Proponent: Interagency Committee for Outdoor Recreation, public and governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: See WSR 96-11-112 for detailed explanation. This supplemental notice identifies an opportunity for a revision to the proposed text, thereby extending the eligibility for waiver-of-retroactivity consideration to all IAC-funded development projects. In some cases, this extended eligibility could allow applicant local governments or state agencies to receive full matching-funds consideration for non-IAC grants and gifts given in respect to a proposed project, where the timing of the Interagency Committee for Outdoor Recreation grant might not otherwise permit full eligibility of such donation or grant for subsequent Interagency Committee for Outdoor Recreation matching purposes.

Proposal Changes the Following Existing Rules: See discussion above.

No small business economic impact statement has been prepared under chapter 19.85 RCW. Not applicable. Only affected parties are local governments and state agencies.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The Interagency Committee for Outdoor Recreation is not a listed agency in section 201, and proposed rules are technical, affecting governmental parties only.

Hearing Location: Water Resources Education Center, 4600 S.E. Columbia Way, Vancouver, WA, on July 12, 1996, at 8:30 a.m.

Assistance for Persons with Disabilities: Contact Greg Lovelady by July 1, 1996, TDD (360) 902-1996, or (360) 902-3000.

Submit Written Comments to: Greg Lovelady, Rules Coordinator, Interagency Committee for Outdoor Recreation, P.O. Box 40917, Olympia 98504-0917, FAX (360) 902-3026, by June 24, 1996.

Date of Intended Adoption: July 12, 1996.

May 23, 1996 Laura E. Johnson Director

AMENDATORY SECTION (Amending WSR 96-08-044, filed 3/29/96, effective 4/29/96)

WAC 286-13-085 Retroactive and increased costs. See WAC 286-04-010 for definition of terms for the following section.

(1) Retroactive land acquisition costs.

The director may grant a waiver of retroactivity whenever an applicant asserts, in writing, that a condition exists which may jeopardize the project. When evidence warrants, the director may grant the applicant permission to proceed by issuing the written waiver. This waiver of retroactivity will not be construed as an approval of the proposed project. If the project is subsequently approved, however, the costs incurred will be eligible for assistance. If the project is to remain eligible for grant support from federal funds, the director shall not authorize a waiver of retroactivity to the applicant until the federal agency administering the federal funds has issued its own waiver of retroactivity as provided under its rules and regulations.

(2) Retroactive development costs. The only retroactive development costs eligible for reimbursement consideration are preliminary expenses (e.g., engineering costs).

However, the director is authorized to grant a waiver of retroactivity which establishes eligibility for future reimbursement of all appropriate development costs. Such applicants' retroactivity requests must be in writing, and provide sufficient justification. Reimbursement of expenditures is subject to the provisions of WAC 286-13-070.

- (3) Cost increases.
- (a) Cost increases for approved projects may be granted by the committee if financial resources are available.
- (b) Each cost increase request will be considered on its merits.
- (c) If an approved project recommended for federal funding is denied by the appropriate federal agency, the sponsor may request that the committee increase assistance by an equivalent amount; such requests shall be considered on their merits.
- (d) The director may approve a sponsor's development project cost increase request so long as the total request does not exceed ten percent of the project's approved initial cost. The director may also approve land acquisition cost increase requests so long as the total request for each parcel does not exceed ten percent of both the committee approved initial cost and the appraised and reviewed value of each parcel for which a cost increase is requested.

Chapter 284-43 WAC ((CERTIFIED)) HEALTH ((PLANS)) CARRIERS

NEW SECTION

WAC 284-43-100 Health carrier standards for women's right to directly access certain health care practitioners for women's health care services. (1) "Women's health care services" is defined to include, but need not be limited to, maternity care, reproductive health services, gynecological care, general examination, and preventive care as medically appropriate, and medically appropriate follow-up visits for these services. General examinations, preventive care and medically appropriate follow-up care are limited to services related to maternity, reproductive health services, gynecological care or other health services that are particular to women, such as breast

examinations. Women's health care services also include any appropriate health care service for other health problems, discovered and treated during the course of a visit to a women's health care practitioner for a women's health care service, which is within the practitioner's scope of practice.

- (2) A health carrier shall not deny coverage for medically appropriate laboratory services, imaging services, diagnostic services, or prescriptions for pharmaceutical or medical supplies, which are ordered by a directly accessed women's health care practitioner, and which are within the practitioner's scope of practice, if such services would be covered when provided by another type of health care practitioner. A health carrier shall not require authorization by another type of health care practitioner for these services.
- (3) All health carriers shall permit each female policyholder, subscriber, enrolled participant, or beneficiary of carrier policies, plans, and programs written, amended, or renewed after July 23, 1995, to directly access the types of women's health care practitioners identified in RCW 48.42.100(2), for appropriate covered women's health care services without prior referral from another health care practitioner. Direct access may be limited to those women's health care practitioners who have signed participating provider agreements with the carrier. If a benefit plan limits patient access to a network of participating providers for other health care services, then it may limit access for women's health care service, but the carrier shall include in all of its networks all types of practitioners included in the definition of women's health care practitioners at RCW 48.42.100(2). Health carriers shall include in all their provider networks sufficient numbers of women's health care practitioners to accommodate the direct access needs of their enrollees.
- (4) To inform enrollees of their rights under RCW 48.42.100, all health carriers shall:
- (a) Include in enrollee handbooks a written explanation of a women's right to directly access women's health care practitioners for covered women's health care services. Enrollee handbooks shall include information regarding any limitations to direct access, including, but not limited to:
- (i) A closed network of practitioners, or any limitation on access to women's health care practitioners based on a women's choice of primary care provider; and
- (ii) The carrier's right to limit coverage to medically necessary and appropriate women's health care services.
- (b) Include a statement in enrollment materials provided to applicants if a women's choice of primary care provider will limit her choices of women's health care practitioners. The text of this statement shall be printed in type not less than eight point.
- (5) No carrier shall impose cost sharing, such as copayments or deductibles, for directly accessed women's health care services, that are not required for access to health care practitioners acting as primary care providers.

WSR 96-12-074 PROPOSED RULES DEPARTMENT OF HEALTH

[Filed June 4, 1996, 3:24 p.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 96-08-029.

Title of Rule: WAC 246-282-990 Fees, establishes a shellfish export certificate fee.

Purpose: An increase in the number of shellfish export certificates being requested has made it necessary for the department to establish a fee to cover program costs associated with issuing the certificates.

Other Identifying Information: Proposed fee is \$10 per certificate to cover agency costs.

Statutory Authority for Adoption: RCW 69.30.030, 43.20B.020.

Summary: This rule defines an export certificate and establishes a fee of \$10 per certificate.

Reasons Supporting Proposal: The number of requests for certificates has increased sharply and is placing burden on program resources. Establishing a fee to cover the cost of issuing certificates will allow the department to continue the program.

Name of Agency Personnel Responsible for Drafting: Ned Therien, Airdustrial Center, Building 4, Olympia, Washington, (360) 664-4372; Implementation and Enforcement: Jennifer Tebaldi, Airdustrial Center, Building 4, Olympia, Washington, (360) 664-3257.

Name of Proponent: Department of Health, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Many Asian countries require a health certificate from a state or federal health authority before accepting any shellfish imports. The Department of Health has been issuing export certificates as a courtesy to the shellfish industry for years. However, a large increase in the number of certificates being requested requires the department to establish a fee to cover the cost of providing these certificates. The proposed rule defines export certificates and sets a fee of ten dollars per certificate. The affected parties are certified shippers exporting molluscan shellfish to Asia.

Proposal Changes the Following Existing Rules: Amends WAC 246-282-990 to create an export certificate for shellfish exporters who export to Asia. Establishes a \$10 fee to cover program costs.

A small business economic impact statement has been prepared under chapter 19.85 RCW.

Economic Impact Analysis and Small Business Economic Impact Statement

This report contains two sections. The first, the economic impact analysis was used by the Office of Shell-fish Programs in determining program costs associated with issuing export certificates. The proposed fee is based on this analysis. The second section contains the small business economic impact statement. This section addresses the impact of the proposed fee on small businesses and whether the impact is disproportionate compared to large businesses.

ECONOMIC IMPACT ANALYSIS Introduction

The Office of Shellfish Programs (OSP) of the Department of Health began issuing export certificates in 1993, in response to requests from the molluscan shellfish industry.

The number of certificates issued has increased from sixty in 1993 to one hundred seventeen in 1994 and nine hundred fifty-one in 1995. In the first quarter of 1996, the OSP issued seven hundred eighty export certificates. The certificates have been issued without charge as a service to certified shellfish shippers. Washington laws and regulations do not require them to be issued. Responding to the increasing number of requests for the certificates has become a significant burden to staff of the OSP. In order to recover the cost of the service, the OSP proposes to start charging a fee to those individuals requesting the certificates.

Need for Export Certificates

Many foreign governments are requiring that some kind of certificate from a regulatory authority where shellfish originate accompany each import shipment. The purpose of the certificates is to provide some assurance that shellfish have been grown and harvested safely. European community (EC) countries are now requiring each importer of shellfish to document that the product has been produced and distributed according to proper hazard analysis critical control point (HACCP) plans. The United States Food and Drug Administration (FDA) is providing the assurances required by EC countries to allow importation of shellfish from certified shellfish shippers in the United States. However, the FDA has decided not to issue the type of export certificates being required by many Asian governments. Shellfish companies wishing to export to Asia have turned to state authorities to obtain export certificates. Without export certificates, shellfish companies lose the potential to market their products in some countries to customers who are willing to pay premium price for shellfish products.

Cost of Providing Export Certificates

The number of export certificates issued by the OSP in January 1996 was three hundred twenty-six, which was the highest ever for any month. The number was two hundred eleven in February 1996 and two hundred forty-one in March 1996. The average number of certificates requested per month in the first quarter of 1996 was two hundred sixty. The average number requested per month in the last quarter of 1995 was one hundred fifty-nine. The following estimate of expenses for OSP to issue export certificates uses an assumption of two thousand five hundred certificates being requested per year.

Export Certification Fees Charged by Other Jurisdictions

Oregon and California already charge fees for shellfish export certificates. Oregon charges \$10 for each certificate. The exporter must be certified as a shellfish shipper in Oregon to be considered. California charges each exporter a one-time fee of \$100 before considering issuing an export certificate. The exporter must be certified as a shellfish shipper in California. A fee of \$25 is then charged for each export certificate. Neither Oregon nor California conduct inspections of individual shellfish lots before issuing export certificates.

British Columbia issues two types of export certificates for shellfish. One type involves inspections of individual shellfish lots for a minimum fee of \$100. The other type of export certificate does not involve individual lot inspections and costs \$25 per certificate.

Alternative for Export Certificates

The United States Department of Commerce (USDC) operates several voluntary inspection and certification programs for seafood processors. One service they offer is the issuance of export health certificates for specific lots of shellfish. They charge a fee for this service at the rate of \$67.92 per hour. Only the requests of exporters who are certified by the state agencies with jurisdiction over the growth, harvest, and processing of the shellfish are given consideration. A USDC staff person then conducts an inspection of each lot of seafood to be exported, usually at the shipping facility. If the seafood lot appears to be packaged in a sanitary manner an export certificate will be issued. The USDC charges for a minimum of one hour of time per inspection, two hours on weekends. Certificates are specific to each shellfish lot.

SMALL BUSINESS ECONOMIC IMPACT STATEMENT Introduction

Export certificates have been issued since 1993 with costs incurred and absorbed by both agency and industry. From this perspective, the only fiscal impact from the rule establishing a fee is just the \$10 fee per certificate. However, because the proposed rule formalizes a process that has not previously been economically analyzed, and the impetus for the rule was a realization by the department that they could not continue to absorb their costs, the department felt it important to examine the cost of the entire activity for small businesses.

In preparing this small business economic impact statement, the department used SIC code 0913, Commercial fishing-shellfish which has a minor impact threshold of \$50. The impact of the proposed rule, \$10 for each certificate, is below this threshold. However, over the course of a year it is very likely that a business would request enough certificates to put them over the \$50 threshold.

(A) Reporting, record-keeping and professional services

The export certificate activity can be broken down into three mainly clerical steps.

- 1. Filling out an application and, in most cases, faxing it to the Office of Shellfish Programs (OSP). This application is a one page form asking such questions as what is being shipped, where is it being shipped, harvest location and date of harvest.
- 2. Receiving the certificate from OSP. With enough lead time, OSP is able to mail the certificate to the company. In many cases, due to the nature of handling a live product, the timing is so short that the certificates must be picked up from OSP in Olympia. Some firms opt to use a courier service. The firms must have original certificates. Therefore, they cannot be faxed by OSP.
- 3. Filling out the certificate, making a copy and mailing the copy back to OSP.
 - (B) Costs of compliance, including costs of equipment

An industry survey indicates a range of costs, most due to Step 2 above.

- 1. Time to fill out an application and cost to fax it to OSP. 20 min. @ \$20/hr salary and benefits \$6.60 Fax costs \$2.00
- 2. Receive certificate from OSP
 Enough lead time given to OSP for mailing
 Time limitations require courier pick up up to \$35.00
- 3. Time to fill out certificate copy and mail back to OSP 20 min. @ \$20/hr salary and benefits \$6.60 copy and mailing cost \$.80

Range of costs to business identified for activity 6.00-51.00 Impact of proposed fee \$10.00

Total Range of costs

\$26.00-61.00

(C) Consideration of whether compliance will cause businesses to lose sales or revenue.

Denial of a certificate by the department would cause a business to lose sales and revenue. A denial would happen if the department questioned the origin of the shellfish or the license status of the applicant and had cause to believe a public health risk existed. Compliance with the proposed fee will allow businesses that are also in compliance with rules for the sanitary control of shellfish to participate in the Asian shellfish market, enhancing sales and revenue.

(D) Comparison of the cost of compliance for small businesses and the cost of compliance for the 10% of the largest businesses who must comply.

The export certificates are provided on a per shipment basis, instead of a per pound or per sales rate. The cost per certificate or per hour of labor is the same for both a large and small business. Over the course of a year large businesses will pay more fees than small businesses because they have many more shipments.

| BUSINESS TYPE | AVERAGE # OF CERTIFICATES PER YEAR | COST | AVERAGE TOTAL COST |
|--------------------------------|---------------------------------------|---------|-----------------------|
| Small (less than 50 employees) | _48* | \$26.** | . \$1248 |
| Large (more than 50 employees) | 147* | \$26** | \$3822 |

- * The average number of certificates are taken from department records for 1995.
- ** Using the low range cost for the total activity.

(E) Steps taken by the agency to reduce the costs of the rule on small businesses or reasonable justification for not doing so.

The department has three reasons for not mitigating small business costs. 1) The proposed rule establishes a fee to cover the service of a strictly voluntary program that is not mandated by statute. 2) The proposed \$10 fee is minimal and not disproportionate. (The other costs associated with the activity will continue, assuming the department continues the program.) 3) The United States Department of Commerce also operates voluntary inspection and certification programs for seafood processors providing an alternative for small businesses.

(F) How the agency involved small businesses in the development of the rule.

The department involved the shellfish industry from the beginning of the rule-making process through discussions with industry representatives and solicitation of comments on issue papers. Additionally, all six small business that requested and received export certificates in 1995 were contacted for this small business economic impact statement with three responding.

(G) Provide a list of industries that will be required to comply with the rule.

The only businesses eligible to receive an export certificate are those holding a license to ship shellfish. They are generally classed as #0913, Commercial Fishing-Shellfish (SIC). Attached is a list of all shellstock shippers currently licensed with the department. This list represents those businesses who are potentially impacted. Department records for 1995 show only ten businesses, six small and four large, requested and received export certificates.

A copy of the statement may be obtained by writing to Ned Therien, Office of Shellfish Programs, P.O. Box 47824, Olympia, WA 98504-7824, phone (360) 664-4372, or FAX (360) 586-4499.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption.

This rule does not subject a person to a penalty or sanction; does not establish, alter or revoke a qualification or standard for licensure; and does not make significant amendment to a policy or regulatory program. This rule establishes a fee pursuant to RCW 43.20B.020. RCW 34.05.328 (5)(b)(vi) exempts rules that set or adjust fees pursuant to legislative standards from the significant legislative rule analysis described in section 201, chapter 403, Laws of 1995.

WSR 96-12-082 PROPOSED RULES EMPLOYMENT SECURITY DEPARTMENT

[Filed June 5, 1996, 9:55 a.m.]

Original Notice.

Preproposal statement of inquiry was filed as WSR 96-03-158.

Title of Rule: WAC 192-12-300 Mailing addresses for notice to employer and 192-12-305 Claimant responsibility for providing accurate employer address.

Purpose: WAC 192-12-300 specifies the address to which the notices required by RCW 50.20.150 and WAC 192-12-310 will be mailed. WAC 192-12-305 specifies the penalties which could apply to a claimant who finals to provide an accurate employer address as required by WAC 192-12-300.

Statutory Authority for Adoption: RCW 50.12.010, 50.12.040.

Statute Being Implemented: RCW 50.20.150.

Summary: WAC 192-12-300 is amended to authorize the department to mail the notice to the last employer to an address other than that provided by the claimant in certain cases. WAC 192-12-305 is repealed.

Reasons Supporting Proposal: Mailing directly to a cost control firm representing an employer in unemployment insurance matters, or to another address provided by the employer, will promote timely responses to requests for information by the department. WAC 192-12-305 is repealed as unnecessary.

Name of Agency Personnel Responsible for Drafting: Juanita Myers, 212 Maple Park, Olympia, (360) 902-9665; Implementation and Enforcement: Dale Ziegler, 212 Maple Park, Olympia, (360) 902-9303.

Name of Proponent: Employment Security Department, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 192-12-300, specifies the addresses to which certain employer notices will be mailed. Subsection (1) requires that the notice to last employer be mailed to the address provided by the claimant. Some employers retain cost control firms to handle unemployment insurance matters on their behalf. Other firms, particularly those with multiple work sites, have a central office that handles personnel matters, including unemployment claims. The department asks for a response to the notice to last employer within ten days. It is more efficient to mail directly to the cost control firm or to the employer requested address, rather than to the address provided by the claimant (which is generally his or her work site), from which it must be forwarded to the cost

control firm or other address for a response. WAC 192-12-305, specifies the penalties for a claimant who fails to provide an accurate mailing address for the employer. However, with implementation of a new computerized system, staff will have on-line access to a mailing address for the employer. In addition, proposed amendments to WAC 192-12-300 authorize the department to mail notices to addresses other than that provided by the claimant.

Proposal Changes the Following Existing Rules: The proposed amendment to WAC 192-12-300 authorizes the department to mail the notice to last employer to an address other than that provided by the claimant when (a) the department is aware the employer is represented in unemployment insurance matters by an employer representative or cost control firm or (b) when the employer has requested that notices be mailed to a specific address. WAC 192-12-305 is repealed.

No small business economic impact statement has been prepared under chapter 19.85 RCW. The proposed changes have no economic impact on businesses in general, or small businesses in particular. The amendment to WAC 192-12-300 simply authorizes the department to mail last employer notices to an address that will promote a more timely response. WAC 192-12-305 is only rarely used; with the implementation of the department's new computerized system, and the amendments to WAC 192-12-300, the rule is unnecessary.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. The proposed amendments do not constitute significant legislative rules as that term is defined in RCW 34.05.328. They do not subject a violator to a sanction or penalty; establish or alter any qualification for issuance of a license or permit; or make significant amendments to a regulatory program.

AMENDATORY SECTION (Amending WSR 91-19-007, filed 9/6/91, effective 9/8/91)

WAC 192-12-300 Mailing addresses for notice to employer. Notices to employers ((mailed as)) required ((in)) by RCW 50.20.150 and WAC 192-12-310 will be mailed as follows:

- (1) The notice to the last employer of the claimant will be mailed to the address provided by the claimant. However, an alternative mailing address may be used in the following circumstances:
- (a) If the job service center knows an employer is represented for unemployment insurance purposes by an

employer representative or cost control firm, the notice to the last employer may be mailed directly to that firm; or

- (b) If an employer has notified the job service center that unemployment claim notices should be mailed to a specified address, the notice to the last employer may be mailed directly to that address.
- (2) The notice to any base year employer who has reported wages to the department will be mailed to the <u>employer's</u> mailing address of record ((of the employer)) provided by the employer for tax purposes.
- (3) The notice to any other employer from whom the claimant has a potentially disqualifying separation (without sufficient subsequent employment to purge a separation disqualification) will be mailed to the address provided by the claimant.

REPEALER

The following section of the Washington Administrative Code is repealed:

WSR 96-12-083 PROPOSED RULES PUGET SOUND AIR POLLUTION CONTROL AGENCY

[Filed June 5, 1996, 9:58 a.m.]

Original Notice.

Exempt from preproposal statement of inquiry under RCW 70.94.141(1).

Title of Rule: Amend Section 2.09, Regulation II.

Purpose: To eliminate the oxygenated gasoline program and establish a contingency measure and fee schedule in the event ambient air quality standards for carbon monoxide are violated in the future.

Other Identifying Information: Section 2.09 pertains to Oxygenated Gasoline.

Statutory Authority for Adoption: Chapter 70.94 RCW. Statute Being Implemented: RCW 70.94.141.

Summary: This proposal will establish a contingency measure and fee schedule in the event carbon monoxide standards are violated. The current oxygenated gasoline program will be eliminated in accordance with the carbon monoxide maintenance plan.

The following regulations apply to the practice of HUNTING BLACK BEAR WITH BAIT.

Definition of Bait: A bait shall be defined as any substance placed with the intent of attracting bear.

Bait Types: It is unlawful to hunt bear with the aid of any bait other than unprocessed plant and plant parts including fruit, inedible parts of legally obtained food fish, game fish, and game animals; carcasses of legally trapped furbearing animals (hide removed); carcasses of unclassified fish and unclassified wildlife, and parts of domestic livestock carcasses.

Baits may not contain paper, cardboard, plastic, glass, aluminum, tin, steel, or styrofoam, or other packaging materials.

All other baits are illegal.

Placement of Bait: Baits for black bear may not be placed in an area until five days prior to the start of that area's established bear harvest season.

A bait may not be placed within fifty yards of any body of water (lake, pond, reservoir, stream, river, and spring), and not within two hundred yards of any road open to vehicular traffic or publicly maintained trail.

A bait may not be placed within one-half mile of any publicly designated administrative site, campground, picnic area, landfill or dump site, and not within one-quarter mile of any permanent residence or seasonal dwelling (except that private landowners may bait on their property within one-quarter mile of their own residence or seasonal dwelling when such baiting does not violate any of the aforementioned distance requirements with adjacent landholders).

Bait Containers: Bait must be contained within an excavated pit, or within a confine constructed of materials located at the site. Such containment structures might include, but not be restricted to, log cubbies, rock piles and stumps. Containers may also be used to hold bait, but if used, must be securely fastened (to tree, ground, post, etc.).

Any items used to contain or to fasten bait containment materials such as metal drums, nails, screws, bolts, rope, reinforcing rod, and spikes shall be removed from the area within 48 hours of the close of the bear harvest season. Excavated pits shall be filled and the area returned to prebaiting condition. Tree stands and materials used to construct and erect tree stands shall be removed within the same 48-hour period (except that tree stands may be left on private property with landowner's permission).

All hunters who hunt bear with bait shall affix their bear tag number at their bear baiting sites in such a manner that it remains conspicuous and legible for the duration of the bear season.

Title of Rule: New sections WAC 315-11A-174 Instant Game Number 174 (\$2 Double Joker), 315-11A-175 Instant Game Number 175 (Cash Vault), 315-11A-176 Instant Game Number 176 (Amazing 8s), 315-11A-177 Instant Game Number 177 (\$2 Jumbo Bucks), 315-11A-178 Instant Game Number 178 (Royal Flush) and 315-11A-179 Instant Game Number 179 (Crazy Cash); and amending chapter 315-06 WAC, General lottery rules, chapter 315-34 WAC, 6 of 49 Lotto rules, WAC 315-11A-162 Instant Game Number 162 (\$2 Double Up), 315-11A-164 Instant Game Number 164 (Blackjack), 315-11A-167 Instant Game Number 167 (100 Grands), and 315-11A-169 Instant Game Number 169 (Aces High).

Purpose: To establish the game play rules and criteria for determining winners of Instant Game Numbers 174 ("\$2 Double Joker"), 175 ("Cash Vault"), 176 ("Amazing 8s"), 177 ("\$2 Jumbo Bucks"), 178 ("Royal Flush") and 179 ("Crazy Cash"); and to amend chapters 315-06 and 315-34 WAC, and WAC 315-11A-162, 315-11A-164, 315-11A-167, and 315-11A-169.

Statutory Authority for Adoption: RCW 67.70.040. Statute Being Implemented: RCW 67.70.040.

Summary: See Purpose above.

Reasons Supporting Proposal: See Explanation of Rule below.

Name of Agency Personnel Responsible for Drafting: Judith Giniger, Rules Coordinator, Olympia, (360) 586-1088; Implementation and Enforcement: Evelyn P. Yenson, Director, Olympia, (360) 753-3330.

Name of Proponent: Washington State Lottery Commission, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 315-11A-174, 315-11A-175, 315-11A-176, 315-11A-177, 315-11A-178 and 315-11A-179, for each game, certain terms must be defined in order to provide consistency in the game play rules. The play criteria will explain how the game functions to licensed retailers and players. Rigid validation requirements are set forth which will prevent the lottery or its retailers from paying out prize money on invalid tickets.

Proposal Changes the Following Existing Rules: The proposal amends (a) chapter 315-06 WAC to permit Lotto jackpot winners to assign their prizes to a third party and allow the lottery to recover actual costs incurred to process assignments; (b) chapter 315-34 WAC to enact a "Double Lotto" enhancement to the existing Lotto game; (c) WAC 315-11A-164 to alter the play symbols and captions, add an \$8.00 prize symbol and caption, alter the \$700 prize symbol, and change the location of the prize symbol on the ticket; (d) WAC 315-11A-162, which changes the name of game 162; (e) WAC 315-11A-167, which corrects a typographical error; and (f) WAC 315-11A-169 to clarify that the three-digit ticket number appears before each play symbol caption in game 169.

No small business economic impact statement has been prepared under chapter 19.85 RCW. The lottery has considered whether these rules are subject to the Regulatory Fairness Act, chapter 19.85 RCW, and has determined that they are not for the following reasons: (1) The rules have no economic impact on business' cost of equipment, supplies, labor or administrative costs. The rules are designed to establish rules and procedures for the playing of instant lottery games; and (2) the rules will have a negligible impact, if any, on business because they are interpretive.

They have been promulgated for the purpose of stating policy, procedure and practice and do not include requirements for forms, fees, appearances or other actions by business.

Section 201, chapter 403, Laws of 1995, does not apply to this rule adoption. Said section does not apply to these proposed rules because they are not proposed by one of the listed agencies. As the rules are merely interpretive, the lottery does not voluntarily apply this section.

Hearing Location: Washington State Lottery, Suite 106, 5936 Corson Avenue South, Seattle, WA 98108, on July 12, 1996, at 10:00 a.m.

Assistance for Persons with Disabilities: Contact Judy Giniger by July 5, 1996, (360) 586-1088.

The claimant must submit his or her Social Security number (SSN) or the federal employer's identification number (FEIN) when claiming any prize exceeding six hundred dollars.
- (3) A claim may be entered in the name of a claimant other than a natural person only if the claimant is a legal entity and possesses a federal employer's identification number (FEIN) as issued by the Internal Revenue Service, such number is shown on the claim form and the entity's terms comply with subsection (4) of this section. Groups, family units, organizations, clubs, or other organizations which are not a legal entity, or do not possess a federal employer's identification number, shall designate one natural person or one legal entity in whose name the claim is to be entered.
- (4) The terms governing a claimant other than a natural person, i.e., articles of incorporation, trust terms, etc., shall be submitted to the director for approval. Terms not in compliance with lottery statutes or rules shall not be approved. Payment shall not be made to a claimant other than a natural person until the director has approved the terms.

- (6) Unless otherwise provided in the rules for a specific type of game, a claimant shall sign the back of the ticket and/or complete and sign a claim form approved by the director. The claimant shall submit the claim form and/or claimant's ticket to the lottery in accordance with the director's instructions as stated in the players' manual and/or on the back of the ticket or submit a request for reconstruction of an alleged winning ticket and sufficient evidence to enable reconstruction and that the claimant had submitted a claim for the prize, if any, for that ticket. - (10) In the event that there is a dispute or it appears that a dispute may occur relative to any prize, the director may refrain from making payment of the prize pending a final determination by the director or by a court of competent jurisdiction relative to the same.
- (11) A ticket that has been legally issued by a lottery retailer is a bearer instrument until signed. The person who signs the ticket or has possession of an unsigned ticket is considered the bearer of the ticket. Payment of any prize may be made to the bearer, and all liability of the state, its officials, officers, and employees and of the commission, director and employees of the commission terminates upon payment.

All delayed payments shall be brought up to date immediately upon the director's confirmation and continue to be paid on each originally scheduled payment date thereafter.
- (14) If any prize is payable for the life of the winner, only a natural person may claim such a prize.
- (15) The director's decisions and judgments in respect to the determination of a winning ticket or of any other dispute arising from the payment or awarding of prizes shall be final and binding upon all participants in the lottery.
- (16) Each lottery retailer shall pay all prizes authorized to be paid by the lottery retailer by these rules during its normal business hours at the location designated on its license.
- (17) In the event a dispute between the director and the claimant occurs as to whether the ticket is a winning ticket, and if the ticket prize is not paid, the director may, solely at his or her option, replace the disputed ticket with an unplayed ticket (or tickets of equivalent sales price from any game). This shall be the sole and exclusive remedy of the claimant.

WSR 96-11-067 PERMANENT RULES DEPARTMENT OF LABOR AND INDUSTRIES

[Filed May 10, 1996, 11:12 a.m., effective January 1, 1997]

Date of Adoption: May 10, 1996.

Purpose: Chapter 296-305 WAC, Safety standards for fire fighters, based on its review of the rule-making record, and in accordance with the provisions of the Washington Industrial Safety and Health Act (WISHA) of 1973 (chapter 49.17 RCW), the fire service advisory committee requested modifications to rules for state and local government fire fighters and volunteer fire fighting organizations under the auspices of state and local governments.

Following research by, and pursuant to, the recommendations of the industry fire service advisory committee, the committee determined that the existing standards do not adequately protect fire fighters from atmospheric, mechanical, and other hazards. The ongoing need for safety and health criteria to be followed through the line of command at fires and other hazardous sites can be satisfied only through the implementation of a comprehensive and upgraded fire fighter safety and health program.

The state had existing standards specifically addressing fire fighter safety and health hazards. However, they did not adequately address many of the new federally mandated regulations that have been promulgated in the past five years. As a state-plan state, working in cooperation with the federal OSHA regulations, WISHA's policy is to protect all state and local government employees with regulations that are atleast-as-effective-as those rules promulgated for private industry.

Compliance with the provisions of these adopted standards will effectively provide more comprehensive protection to employees who work as fire fighters for state and local governments from injury, occupational health hazards, or death.

The complete vertical fire fighter standard has been revised. Adopted state-initiated amendments are summarized below:

The majority of sections in the standard were amended, moved and incorporated into other existing or new sections for reorganization of information. These section numbers are being repealed. Existing sections adopted with this type of amendment are:

NEW SECTION

WAC 296-305-01001 Foreword. These fire fighter safety and health standards were adopted by the department of labor and industries in accordance with the provisions of the Washington Industrial Safety and Health Act (WISHA) of 1973 (chapter 49.17 RCW), with recommendations from the fire service advisory committee.

The purpose of this chapter is to assist employers and employees in the reduction of work related injuries and illnesses. In addition to providing an enforceable set of safety and health standards for the fire protection services, it is the intent of the department that the provisions of this chapter be used to assist both employers and employees in achieving the safest workplace reasonably attainable under the conditions to which employees are or will be exposed.

NEW SECTION

WAC 296-305-01002 Effective date. Unless a particular provision of this chapter specifies otherwise, the effective date of chapter 296-305 WAC, shall be January 1, 1997.

NEW SECTION

WAC 296-305-01003 Scope and application. (1) The rules of this chapter shall apply with respect to any and all activities, operations and equipment of employers and employees involved in providing fire protection services which are subject to the provisions of the Washington

Industrial Safety and Health Act of 1973 (chapter 49.17 RCW).

- (2) The provisions of this chapter apply to all fire fighters and their work places, including the fire combat scene. Although enforcement of applicable standards will result from provable violations of these standards at the fire combat scene, agents of the department will not act in any manner that will reduce or interfere with the effectiveness of the emergency response of a fire fighting unit. Activities directly related to the combating of a fire will not be subjected to the immediate restraint provisions of RCW 49.17.130.
- (3) In the development of this document many consensus standards of the industry were considered and evaluated as to adaptability to the Washington State Fire Service industry. Where adaptable and meaningful, the fire fighter safety elements of these standards were incorporated into this WAC. Chapter 296-305 WAC, shall be considered as the fire fighter safety standards for the state of Washington.
- (4) The provisions of this chapter cover existing requirements that apply to all fire departments. All fire departments shall have in place their own policy statement and operating instructions that meet or exceed these requirements. This chapter contains state and/or federal performance criteria that fire departments shall meet.
- (5) Unless specifically stated otherwise by rule, if a duplication of regulations, or a conflict exists between the rules regulating wildland fire fighting and other rules in the chapter, only the rules regulating wildland fire fighting shall apply to wildland fire fighting activities and equipment.
- (6) The provisions of this chapter shall be supplemented by the provisions of the general safety and health standards of the department of labor and industries, chapters 296-24 (including Part G-2, Fire protection) and 296-62 WAC. In the event of conflict between any provision(s) of this chapter and any provision(s) of the general safety and health standards, the provision(s) of this chapter shall apply.

Note: For wildland fire fighting personal protective equipment and clothing requirements see WAC 296-305-07003, Personal protective clothing and equipment for wildland fire fighting.

- (1) Employers shall provide and maintain at no cost to the employee the appropriate protective ensemble/protective clothing to protect from the hazards to which the member is or is likely to be exposed. Employers shall ensure the use of all protective equipment and clothing required by this standard. Employers shall assure that the protective clothing and equipment ordered or purchased after the effective date of this standard meets the requirements of this standard. Full protective equipment designated for the task, shall be worn for all department activities.
- (2) Fire fighters shall be trained in the function, donning and doffing, care, use, inspection, maintenance and limitations of the protective equipment assigned to them or available for their use.
- (3) Protective clothing and protective equipment shall be used and maintained in accordance with manufacturer's instructions. A written maintenance, repair, retirement, servicing, and inspection program shall be established for protective clothing and equipment. Specific responsibilities shall be assigned for inspection and maintenance. This requirement applies to fire fighter's personally owned equipment as well as equipment issued by the employer.
- (4) The fire department shall provide for the cleaning of protective clothing and contaminated station/work uniforms at no cost to the employee. Such cleaning shall be performed by either a cleaning service, or at a fire department facility, that is equipped to handle contaminated clothing.

Note: See Appendix A.

- (5) Personal protective equipment and clothing shall be of a type specified by NIOSH, MSHA, NFPA, ANSI, or as specifically referenced in the appropriate section of this chapter.
- (6) Station/work uniforms. Station/work uniforms are not themselves intended as primary protective garments.

- (a) Station/work uniforms if provided, shall meet the requirements as specified in NFPA 1975, 1990 edition.
- (b) All station/work uniforms purchased after the effective date of this regulation shall meet the requirements set forth in this standard.
- (c) Station/work uniforms include trousers, and/or coveralls, but exclude shirts, underwear, and socks.
- (d) Members shall not wear any clothing that is determined to be unsafe due to poor thermal stability or poor flame resistance when engaged in or exposed to the hazards of structural fire fighting. Because it is impossible to ensure that every member will respond to an incident in a station/ work uniform or will change out of fabrics that have poor thermal stability or ignite easily, before donning protective garments, the fire department shall inform members of the hazards of fabrics that melt, drip, burn, stick to the skin and cause burns to the wearer due to poor thermal stability or poor flame resistance.
- (e) Garments meeting the requirements of WAC 296-305-07003(1), meet the intent of this section.
- (f) Station/work uniforms purchased prior to the effective date of this chapter shall be acceptable for a period of two years or until the employers current inventory has been exhausted, whichever comes first.
 - (7) Turnout clothing/pants and coat:

Proximity clothing:

- (a) All turnout clothing used as proximity clothing shall meet the requirements of NFPA, 1976 Standard on Protective Clothing for Proximity Fire Fighting, 1992 edition.
- (b) There shall be at least a two-inch overlap of all layers of the protective coat and the protective trousers so there is no gaping of the total thermal protection when the protective garments are worn. The minimum overlap shall be determined by measuring the garments on the wearer, without SCBA, with the wearer in the most stretched position, hands together reaching overhead as high as possible.
- (c) Single piece protective coveralls shall not be required to have an overlap of all layers as long as there is continuous full thermal protection.
- (d) Fire departments that provide protective coats with protective resilient wristlets secured through a thumb opening may provide gloves of the gauntlet type for use with these protective coats. Fire departments that do not provide such wristlets attached to all protective coats shall provide gloves of the wristlet type for use with these protective coats.
- (e) Where the SCBA is worn over or outside the proximity protective garment, the fire department shall inform the member of the potential high levels of radiant heat that may result in the failure of the SCBA. The fire department shall require additional approved radiant reflective criteria, including but not limited to a protective cover, for the expected proximity fire fighting exposures when the SCBA is worn over or outside the proximity protective garment.
 - (8) Structural fire fighting clothing.
- (a) All turnout clothing purchased after the effective date of these regulations shall meet the requirements of NFPA, Standard on Protective Clothing for Structural Fire Fighting 1971, 1991 edition. In no case, shall fire fighters wear personal protective clothing manufactured prior to the

1986 edition, NFPA, Standard on Protective Clothing for Structural Fire Fighting 1971.

- (b) Turnout clothing shall be maintained as specified by the manufacturer.
- (c) Repairs to turnout clothing shall be done to the manufacturers specification by qualified individuals approved by the manufacturer. Repairs must be made using materials and methods in accordance with the applicable standards under which the article was produced. Repairs include any and all alterations, modifications, additions, deletions or any other change made to the manufacturers PPE article.
- (d) Turnout clothing which is damaged or does not comply with this section shall not be used.
- (e) All turnout clothing shall be inspected semi-annually by an individual qualified by the employer. Inspection intervals shall not exceed six months.

- (2) Persons whose vision requires the use of corrective lenses in spectacles, and who are required by this standard to wear eye protection, shall wear goggles or spectacles of one of the following types:
- (a) Spectacles with protective lenses that provide optical correction.
- (b) Goggles that can be worn over corrective spectacles without disturbing the adjustment of the spectacles.

- (3) When limitations or precautions are indicated by the manufacturer, they shall be transmitted to the user and care taken to see such limitations and precautions are strictly observed.
- (4) Care, use, and maintenance for any type of eye or face protection shall follow the manufacturers suggested recommendations.
- (5) Goggles shall be inspected, cleaned and disinfected prior to being re-issued to other employees.

Note: The helmet face shield alone does not always provide adequate eye protection against flying particles, splash, gases and vapors. For known eye hazards, such as, but not limited to, cutting with power saws, chopping, drilling and using extrication equipment, the face shield should be worn with additional eye protection.

- (6) Helmet face shields shall meet the requirements of NFPA, Standard Helmets for Structural Fire Fighting 1972, 1992 edition.
- (7) For fire fighters that do not have a helmet face shield for eye and face protection, flexible or cushioned fitting goggles shall be provided.
- (8) Goggles shall consist of a wholly flexible frame, forming a lens holder or a rigid frame with integral lens or lenses, having a separate, cushioned fitting surface on the full periphery of the facial contact area.
- (a) Materials used shall be chemical-resistant, nontoxic, nonirritating and slow burning.
- (b) There shall be a positive means of support on the face, such as an adjustable headband of suitable material or

other appropriate means of support to retain the frame comfortable and snugly in front of the eyes.

(c) Goggles shall meet the requirements of ANSI Z87.1.

Note: In order to reduce noise levels, the following engineering controls may achieve such a reduction:

a. Move siren speakers and air horns down onto the front bumper.

- b. Respond with windows closed.
- c. Install sound-attenuating insulation in cabs of apparatus.
- d. Lower the pitch of siren and air horns.
- e. Improve radio equipment with higher clarity and less output volume.
- (9) For existing fire apparatus that cannot be brought into compliance, the employer shall be required to provide members with hearing protectors.

AMENDATORY SECTION (Amending Order 83-34, filed 11/30/83)

WAC 296-305-07007 ((Apparatus operation communications.)) Wildland personnel accountability. (((1) When fire fighters are required to ride on the tailboard, or tiller's seat, an electrical signal or voice communication system shall be installed between tailboard or tiller's seat and driver compartment. The following set of signals shall be used for communication between the driver and a tillerman, or between the driver and fire fighters riding the tailboard:

- (c) Three buzzes means reverse.

Before any of the above functions are undertaken, with the exception of stopping, the same appropriate signal must be received from the tailboard. Example: If driver is responding to an alarm before starting out, two beeps on the horn will be sounded. Driver will not advance, however, until the same signal is sounded from the tailboard or tillerman.

(2) When using hand signals, these signals are as follows:

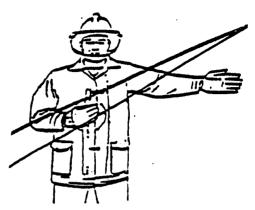

STOP

Hold hands to the side, shoulder high, exposing palms to driver. At night, hold hands in the same manner, with the addition of a flashlight-in one hand, shining at the driver. This will indicate an immediate STOP.

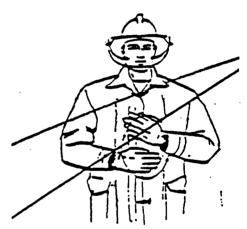

RICHT-OR-LEFT

Point in the desired direction with one hand and motion in a circular "come on" gesture with the other at chest level. At night, direct a flashlight beam at the hand pointing in the desired direction.

AHEAD-OR-BACK-UP

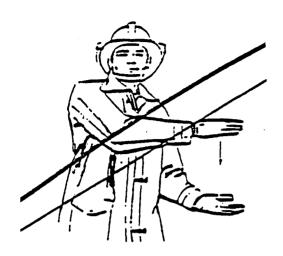

Hold-hands directly in front, chest high, fingers on hands directed toward one another, and motion in a circular "come on" gesture. At night, hold a flashlight in one hand and direct the beam toward the other.

DIMINISHING-CLEARANCE

Hold the hands to one side of the body indicating the approximate amount of distance the apparatus is from the obstacle. Close hands accordingly as the driver slowly maneuvers his apparatus toward same. Close hands as the distance narrows to a point where the signalman indicates immediate STOP. Always allow enough for driver's reaction time. At night, indicate in the same manner with a flashlight in the upper hand and beam directed at the palm of the other. On STOP, cover the flashlight beam with the hands.

- (3) Wildland fire fighters whose duties require them to operate a power chain saw shall wear flexible ballistic nylon pads, sewn or otherwise fastened into the trousers, or other equivalent protection that shall protect the vulnerable areas of the legs. Additional trouser, eye, hearing, face and head protection as required by this chapter shall be worn.
- (4) Employees shall not use the chainsaw to cut directly overhead, or at a distance that would require the operator to relinquish a safe grip on the saw.
- (5) Only personnel trained in firing equipment shall handle and use such equipment, and observe the manufacturers' recommendations.

NEW SECTION

WAC 296-305-07015 Aircraft operations for fighting wildland fires. (1) Whenever fixed wing and rotary wing aircraft are being utilized on an incident, personnel trained in air operations management shall be assigned by the incident commander/operations section chief.

(2) Prior to the initiation of air operations, all personnel operating in close proximity to an air drop shall be notified of such activity.

- (3) Personnel shall not intentionally operate in an area where it can reasonably be expected that they may be hit with retardants or suppressants from fixed wing or rotary aircraft.
- (4) Radio communications shall be maintained between an aircraft/air attack officer and the appropriate ground officer.
- (5) Personnel assigned to ride in rotary wing aircraft shall be briefed in the correct approach, riding and off-loading procedures for the particular type of aircraft.

NEW SECTION

(2) Officers at wildland fires shall be trained in the symptoms of heat-related disorders and shall observe their crews for such behavior. Appropriate action shall be taken in the event a crew member displays such symptoms.

NEW SECTION

- WAC 296-305-07019 Training for wildland fire fighting. (1) This section shall apply to all personnel and agencies called on to provide services at any fire defined as a "wildland fire."

- (a) "Comparable" training shall be determined by the employer.
- (b) Nothing in this section shall preclude the use of local residents, affected parties or contracted fire fighting resources to suppress wildland fires if they are under the direct supervision of a qualified fire line officer.
- (4) Supervisory personnel shall be trained to a level commensurate to the position and responsibility they are to assume.
- (5) All personnel will be trained and capable of demonstrating competency in utilizing the Incident Command System (ICS).
- (6) All suppression personnel shall annually review the Standard Operating Safety Procedures. See Appendix D.

NEW SECTION

WAC 296-305-08000 Appendices. These appendices are nonmandatory and are included to reference and information purposes only.

Appendix A — Recommended cleaning procedures for protective turnout clothing and station uniforms. (1) Protective clothing should be washed separately from other garments.

(2) Do not use chlorine bleach (sodium hypochlorite) as this will adversely affect the tear strength of your protective clothing and lessen its life. Oxygenated bleaches such as Liquid Clorox II, and Vivid may be used. (3) Protective clothing may be spot treated or pretreated for hard to remove stains with products such as liquid Spray and Wash, liquid Tide, liquid dishwashing detergent or liquid Shout.

Note: The use of brand names is intended only to indicate a type of cleaning agent. All products listed by name must be used in accordance with the manufacturer's recommendations. Use of a brand name does not constitute an endorsement nor does omission of a particular product brand imply that a product is inferior. Solvents should not be used as they lesson the life of the garment, reduce visibility on the trim, and degrade leather.

- (4) When pretreating or spot treating a garment, apply the detergent onto the soiled area. Gently rub the fabric together until a light foam appears on the surface. Use a soft bristle brush (toothbrush type) and scrub the area for about one and one-half minutes. Reapply liquid detergent onto the soiled area and place the garment into the washing machine.
- (5) When cleaning turnout clothing the garment should be turned inside out, the hooks and dees fastened, the liner removed, and the garment placed in a laundry bag. These instructions can be used for cleaning any wash loads in a large capacity (sixteen gallon) top loading or front loading machine. Load the machine with any one of the following combinations do not overload:
 - (a) One protective coat and one pair of trousers.
 - (b) Two protective coats.
 - (c) Two protective pair of trousers.

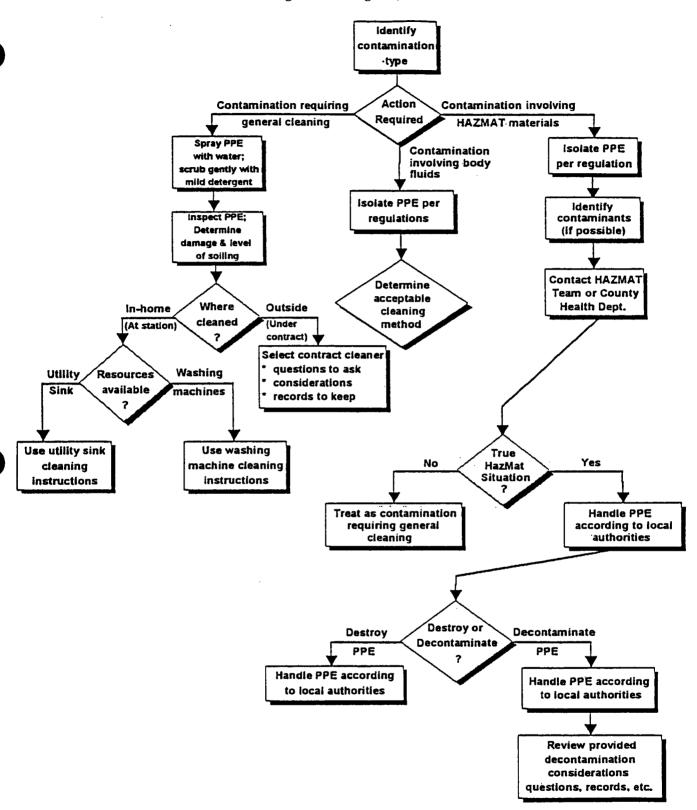

Note: Heavily soiled garments should be treated as outlined in (4).

- (6) While the washing machine is filling with hot water (temperature between 120 degrees F and 130 degrees F), add one-half cup (four ounces) of liquid oxygenated bleach and one cup (eight ounces) of liquid detergent.
 - (a) Fill washing machine to highest water level,
 - (b) Add garments to be washed,
- (c) Set washing machine for normal cycle, cotton white, or similar setting.
- (d) Machines should be programmed for a double rinse. If the machine will not automatically double rinse, a complete second cycle can be run without adding detergent or oxygenated bleach. Double rinse helps remove any residual dirt and ensures detergent removal.
- (e) Remove garments from washing machine when done and dry by hanging in a shaded area that receives good cross ventilation, or hang on a line and use a fan to circulate air. A water extractor may be utilized.
- (f) After the garments have been removed, run the laundry machine empty or with a dummy (rag) load with detergent at least once; but preferably several times to purge the machine of any residue.
- (7) Inspect and examine the trim as to the effectiveness of the trim performance under daytime and nighttime conditions. It is important that a high visibility be maintained at all possible orientations to the light source.
- (8) The above procedures can be used for any article of clothing issued that is not contaminated with bloodborne pathogens or any other infectious disease. For clothing exposed to hazardous materials, consult the manufacturer or the appropriate decontamination document.

- (9) Procedure for clothing (except wool clothing) that has been exposed to bloodborne pathogens or infectious diseases.
- (a) Disposable gloves should be used when handling contaminated clothing.
- (b) Each station should have an area designated for the cleaning of equipment. The area designated should not be near kitchen, living, sleeping, or personal hygiene areas.
- (c) Contaminated clothing should be handled as little as possible with a minimum of agitation. Contaminated clothing should be cleaned as soon as possible. When the on-coming shift has to clean contaminated clothing for the off-going shift, all contaminated clothing should be stored in red biohazard bags, properly sealed to prevent the spread of potential contamination.
- (d) To clean clothing that has been contaminated, a germicidal detergent should be used. Such germicidal should be EPA approved and effective as staphylocidal, pseudomonacidial, virucidal, and fungicicial detergent.
- (e) The germicidal detergent is intended to be a complete disinfecting and cleaning agent when mixed according to the manufacturer's directions. Do not add any chemical or detergent to the germicidal solution. After the clothing has been disinfected the clothing should be washed as outlined under normal use.
- (f) Wool uniforms should be spot cleaned, placed in the red biohazard bags and sent to an industrial laundry for cleaning.
- (10) Helmets, gloves, hoods, and boots should be cleaned as follows:
- (a) Preclean using a germicidal solution and scrub all contaminated areas with a soft bristled brush. Rinse with clean water. Dispose of the precleaning solution by pouring it down the drain in the cleaning area.
- (b) Using a fresh germicidal solution, repeat the above procedure allowing the areas to remain wet for a minimum of fifteen minutes. Double rinse with clean water and air dry. Dispose of the solution by pouring it down the drain in the cleaning area.
- (c) For gloves, use a third fresh water rinse, squeezing and rinsing several times. Dispose of the solution by pouring it down the drain in the cleaning area.
- (11) Front loading industrial laundry machines are designed for the type of cleaning required for protective clothing. Machines are available from Milnor, Model 30015C6M-AAC, for washing; or a Huabsch Originator, Model 3705H, for a dryer.

The use of brand names is intended only to indicate a type of cleaning equipment. All products listed by name must be used in accordance with the manufacturer's recommendations. Use of a brand name does not constitute an endorsement nor does omission of a particular product brand imply that a product is inferior.

PPE Cleaning and Decontamination Decision-Making Process

Appendix B — Life Safety Ropes. (1) Life safety rope may be significantly weakened by abrasion, misuse, contamination, wear, and stresses approaching its breaking strength, particularly impact loading. Since there are no approved

methods to service test a rope without compromising its strength, rope rescue and training operations should be carefully observed and monitored for conditions that could cause immediate failure or result in undetectable damage to the rope.

- (2) If a rope has been used in a situation that could not be supervised or where potential damage may have occurred, it must be removed from service and destroyed.
- (3) It is important that ropes be inspected for signs of wear by qualified individuals after each use. If indication of wear or damage are noted, or if the rope has been stressed in excess of the manufacturer's recommendation or impact loaded, it must be destroyed.
- (4) The destruction of the rope means that it must be removed from service and altered in such a manner that it could not be mistakenly used as a life safety rope. This alteration could include disposing of the rope, or removal of identifying labels and attachments, and cutting the rope into short lengths that could be used for utility purposes.
- (5) The assignment of "disposable" life safety ropes to members or to vehicles has proved to be an effective system to manage ropes that are provided for emergency use and are used infrequently. Special rescue teams, which train frequently and use large quantities of rope, should include members who are qualified to manage and evaluate the condition of their ropes and determine the limitations upon their reuse.

Appendix C — Decontamination. (1) A decontamination area should be established whenever civilians or fire department personnel have had known or suspected exposure to toxic chemicals.

- (2) Such decontamination areas should be established before any personnel are allowed to enter the "Hot" zone.
- (3) The decontamination area should be set up using the following guidelines:
- (a) The decontamination area should be located uphill, upwind and at a right angle to the "Hot" zone.
- (b) The decontamination area entry/exit point and boundaries should be clearly marked using flagging tape, ropes, cones, etc.
- (3) Visqueene should be spread on the ground in the decontamination area to control runoff.
- (4) The decontamination process is divided into stations. In most cases it will not be necessary to utilize all the stations. The decision to use all or part of the stations should be based on the following factors:
 - (a) The hazards associated with the product involved.
 - (b) The estimated levels of contamination.
- (c) The type of protective equipment worn by contaminated responders.
- (d) Recommendations from outside sources such as, but not limited to CHEMTREC, the agency for toxic substance and disease registry, poison control centers or the manufacturer of the product.
- (5) The following is a list of all the stations in a ninestep decontamination area set up for a worst case scenario involving a hazardous materials response team member whose chemical suit has been breached:
- (a) Station #1 Segregated equipment drop: Contaminated equipment that will be used again in the "Hot" zone, disposed of, or decontaminated at a later time or place, will be deposited here.
- (b) Station #2 Wash/rinse: Entry personnel will be washed with appropriate decontamination solution and rinsed

with water by attendant(s) to remove gross contamination. This station may consist of multiple wash/rinse steps depending on the severity of the hazards involved.

- (c) Station #3 Outer protective clothing removal: Attendant(s) will remove the outer protective clothing from entry personnel being cautious to avoid touching the inside of the suit while removing it. Protective clothing that has been removed at this step shall be placed in an overpack or other appropriate container for later testing and further decontamination, if needed.
- (d) Station #4 Removal of SCBA: The entry personnel are assisted in removing their SCBA by an attendant. The SCBA facepiece should be left in place and the low pressure hose held away from any potentially contaminated inner clothing.
- (e) Station #5 Removal of inner clothing: All clothing worn inside the suit must be removed in cases where the suit has been penetrated and the entry personnel are contaminated.
- (f) Station #6 Personal shower: Entry personnel should wash and rinse entire body with mild soap and water. Contain runoff water if possible, however this is an emergency situation and containment is secondary to removing contaminants from personnel.
- (g) Station #7 Drying off: Entry personnel that have showered should dry off using towels or whatever is available. Items used should be placed in an appropriate container for disposal. Emergency clothing such as disposable coveralls should be provided.
- (h) Station #8 Medical evaluation: Entry personnel should be evaluated by paramedics checking vital signs including temperature and level of consciousness. Records of the evaluation must be kept and given to the team safety officer to be included in the members exposure records.
- (i) Station #9 Transport to emergency room: Any personnel exhibiting any signs or symptoms of exposure should be transported to the emergency room for evaluation and observation.
- (6) The hazardous materials response team van should carry premeasured packets of decontamination solution mixes for the purpose of decontaminating chemical protective clothing and other equipment at the scene of a hazardous materials emergency. These solutions are not to be used to decontaminate turnouts or exposed skin under any circumstances.
- (7) The primary solution used will be a simple detergent and water mixture. Other special decontamination solution mixes will only be used in those situations when it is determined that the detergent and water solution is inappropriate.
- (8) Contaminated civilians that are exhibiting signs or symptoms of exposure should be treated as patients. Due to the risk of secondary contamination, all patients should undergo emergency field decontamination at the scene before being evaluated by medical personnel or being transported to the emergency room. Medical personnel should not accept any patient that has not been grossly decontaminated.
- (9) The emergency field decontamination process should consist of removing the clothing from all affected body parts of the exposed person and flushing with copious quantities of water from a garden hose or low pressure one and three-quarter inch handline to remove gross contamination.

Patients will be flushed for up to fifteen minutes, depending on the material recommendations on patient decontamination.

- (10) Members performing patient decontamination should wear, at a minimum, full turnouts and SCBA and should avoid splashes and overspray to the extent possible. They should also undergo decontamination when they have finished decontaminating the patient.
- (11) Containment of the runoff water from patient decontamination is not required. Do not delay decontamination of patients to set up containment. However, some form

of privacy screen should be erected to protect the modesty of those being decontaminated.

(12) Responders that are contaminated in the process of performing rescue or other tasks will, at the minimum, be flushed with water for a minimum of one minute. Further flushing will be performed depending on the extent of contamination and subsequent adverse health effects.

Appendix E—Standard apparatus operation communications.

When fire fighters ride in the tiller's seat or other remote location, an electrical signal or voice communication should be installed between the tiller's seat, work station, and driver's compartment.

- (1) These signals should be used between the driver and the fire fighters:
 - (a) One long buzz means stop;
 - (b) Two buzzes mean forward;
 - (c) Three buzzes mean reverse.
- (2) Before any of the above functions are undertaken, with the exception of stopping, the same signal must be both sent and received. The driver should not act without sending and receiving a confirming signal.
- (3) When using hand signals, these signals are as follows:

STOP

Hold hand to the side, shoulder high, exposing palm to the driver. At night, hold hands in the same manner, with the addition of a flashlight in one hand shinning at the driver. This will indicate an immediate STOP.

STOP

Hold hand to the die, shoulder high, exposing palm to the driver. At night, hold hands in the same manner, with the addition of a flashlight in one hand shining at the driver. This will indicate an immediate STOP.

RIGHT or LEFT

Point in the desired direction with one hand and motion in a circular "come-on" gesture with the other hand at the chest level. At night direct a flashlight beam at the hand pointing in the desired direction.

RIGHT OR LEFT

Point in the desired direction with one hand and motion in a circular "come on" gesture with other at the chest level. At night, direct a flashlight beam at the hand pointing in the desired direction.

DIMINISHING CLEARANCE

Hold the hands to one side of the body indicating the approximate amount of distance the apparatus is from the obstacle. Close hands accordingly as the driver slowly maneuvers the apparatus to point where the signal indicates immediate STOP. Always allow enough for drivers reaction time.

At night, indicate in the same manner with the flashlight in the upper hands and beam directed at the palm of the other. On STOP, cover the flashlight beam with the hands.

WAC 356-56-115 Salary adjustments. (1) Adjustments to the compensation for a position with no change in evaluation points shall not exceed the maximum or fall below the minimum amount set by the director of personnel for the management band. After the initial transition evaluation, salary adjustments initiated by the agency, other than for promotion or demotion, will not normally exceed a total of ten percent for a single fiscal year. Excluded from the ten percent limit on salary increases are annual periodic increments, legislatively approved increases, movement of a position to the minimum of the band, initial transition evaluation adjustments, and promotional increases. Requests for exception may be granted only by the director of personnel. Salary adjustments may be made under the following conditions:

- (a) Legislatively directed general and/or special increase;
- (b) Documented recruitment and/or retention problems as approved by the agency director or designee;
- (c) Documented agency and/or state internal salary relationship problems, as approved by the agency director or designee; or
- (d) Progression adjustments may be granted in recognition of the employee's demonstrated growth and development following initial transition, hire, transfer, or a promotion by up to five percent annually, for a maximum total of twenty percent.
- (2) Voluntary movement in or to a position of lower evaluation points may result in a salary decrease which exceeds ten percent but does not fall below the minimum amount of the band.
- (3) A promotion is the assignment of additional responsibilities which results in higher evaluation points for the same position, or movement to a different position that has higher evaluation points. Promotional increases may exceed ten percent.
- (4) A disciplinary demotion for cause is the assignment of responsibilities which results in lower evaluation points for the same position, or movement to a different position that has lower evaluation points. The resulting salary decrease may exceed ten percent and must be in conformance with the provisions of the Fair Labor Standards Act.
 - (5) Involuntary downward movement based on a

nondisciplinary reassignment of duties that results in lower evaluation points for an employee's present position shall not cause a decrease in the employee's current salary. The employee's current salary will be retained until such time as it is exceeded by the Washington management service salary structure or the employee leaves the position.

- (6) An agency may provide a lump sum recognition payment within guidelines established by the department of personnel in recognition of documented exceptional work and performance results. Such compensation shall not become a permanent salary increase but is considered to be income for recognizing documented exceptional work and performance results. A payment made as a lump sum for recognition purposes shall be included within the ten percent annual adjustment limitation in the fiscal year in which it is paid.
- (7) Salary changes greater than five percent proposed for any group of employees shall require review and approval by the director of personnel.

NEW SECTION

WAC 260-60-300 Who may claim. Who may claim: Owner, authorized agent or prospective owner possessing a claiming certificate.

- (1) In claiming races, any horse is subject to be claimed for its entered price by any owner at that meeting or by a licensed authorized agent for the account of such owner. For the purpose of this rule an "owner" shall be deemed to be an owner as defined in WAC 260-12-010. Furthermore, such owner shall be registered in good faith for racing and has had a horse or horses occupying assigned stall space for the race meeting. The right to claim shall not be forfeited even though all horses occupying such stall space may have been eliminated.
- (2) In addition to the above rule, any horse is subject to be claimed by a person or a licensed authorized agent for the account of such person, providing such person has applied to and has been approved by the commission as a prospective owner and has been issued a claiming certificate. The names of persons obtaining a claiming certificate shall be prominently displayed in the offices of the commission and the racing secretary. Once the prospective owner has successfully claimed a horse he/she must secure an owner's

license on a timely basis. An applicant for a claim certificate shall submit to the Stewards:

- (a) A completed application for a claiming permit and the \$25 fee;
- (b) The name of a licensed trainer who will assume the care and responsibility for any horse claimed;
- (c) The stewards shall issue a claim certificate upon satisfactory evidence that the applicant is eligible for an owner's license;
- (d) The claim certificate shall expire with the conclusion of the race meeting at which it was issued, or upon the claim of a horse, or upon issuance or denial of an owner's license, whichever comes first;
- (e) A claim certificate may be renewed by the stewards during the same year with no additional fee;
- (f) A claiming certificate may be issued to a person who had been licensed as an owner during a previous race meet.

NEW SECTION

WAC 260-60-310 Entering in a claiming race. A person entering a horse in a claiming race warrants that the title to said horse is free and clear of any existing claim or lien, either as security interest mortgage, bill of sale, or lien of any kind; unless before entering such horse, the written consent of the holder of the claim or lien has been filed with the stewards and the racing secretary and its entry approved by the stewards. A transfer of ownership arising from a recognized claiming race will terminate any existing prior lease for that horse.

NEW SECTION

WAC 260-60-320 Limit to number. (1) No person shall claim more than one horse in any one race.

- (2) No authorized agent, although representing several owners shall submit more than one claim for any one race.
- (3) When a stable consists of horses owned by more than one person, trained by the same trainer, not more than one claim may be entered on behalf of such stable in any one race.
- (4) In claiming races not more than two horses in the same interest or under the control of the same trainer can start.

NEW SECTION

WAC 260-60-330 Claims to be in amount printed on program. The claiming price of each horse in a claiming race shall be printed on the program, and all claims for said horse shall be the amount so designated. Except as ordered by the Stewards, no claiming price may be changed after a horse has been entered for a race.

NEW SECTION

WAC 260-60-340 Disposition by lot. Should more than one claim be filed for the same horse, the claim of the horse shall be determined by lot under the direction of one or more of the stewards, or their representative.

NEW SECTION

WAC 260-60-350 Requirements for a claim. (1) Claims must be made in writing and signed by an owner, a licensed prospective owner, or an authorized agent; and

- (2) Shall be made on forms and in envelopes furnished by the association and approved by the commission. Both forms and envelopes must be filled out completely, and must be sufficiently accurate to identify the claim.
- (3) No money shall accompany the claim. Each person desiring to make a claim, must first establish an account with the racing association and have on deposit with the association the whole amount of the claim (including any applicable taxes). The deposit shall be in cash, or in the discretion of the association, a certified or bank cashier check.
- (4) Claims shall be deposited in the claiming box at least fifteen minutes before the established post time of the race for which the claim is filed. When a claim has been filed it is irrevocable and at the risk of claimant.
- (5) When a claiming certificate is to be used, that certificate must accompany the claim, or the claim may be declared void.

NEW SECTION

WAC 260-60-360 Stewards to act on claims. After deposit of the claim the stewards or their authorized representative, shall review the claim. Unless approved at such time, the claim shall be declared void. A ruling declaring a claim to be void shall be final in all respects.

NEW SECTION

WAC 260-60-370 Affidavit. The stewards may, at any time, in their discretion, require any person making a claim for a horse in any claiming race, to affirm in writing that he is claiming said horse for his own account or as authorized agent, and not for any other person.

NEW SECTION

WAC 260-60-380 Prohibited actions. (1) No official or other employee of any association shall give any information as to the filing of claims until after the race has been run.

- (2) No person shall offer, or enter into an agreement, to claim or not to claim, or attempt to prevent another person from claiming, any horse in a claiming race.
- (3) No person shall attempt, by intimidation, to prevent any one from running a horse in any race for which it is entered.
- (4) No owner or trainer, starting a horse in any claiming race, shall make any agreement for the protection of each other's horses.
- (5) A person shall not claim a horse in which he/she has a financial or beneficial interest as an owner or trainer.
- (6) A person shall not cause another person to claim a horse for the purpose of obtaining or retaining an undisclosed financial or beneficial interest in the horse.
- (7) A person shall not claim a horse, or enter into any agreement to have a horse claimed, on behalf of an ineligible or undisclosed person.

NEW SECTION

WAC 260-60-390 Claim in bad faith. If the stewards find that a person has leased, sold or entered a horse merely for the purpose of entering a claim, that claim may be declared void.

NEW SECTION

WAC 260-60-400 Entry of a filly or mare in foal. No person shall enter a filly or mare in a race when such mare is pregnant, unless prior to the time of entry the owner shall have deposited with the racing secretary a signed agreement providing that the owner will at the time of entry provide for the successful claimant of such mare, without cost, protest, or fee of any kind, a valid stallion service certificate covering the breeding of the mare. A successful claimant of a mare may file with the commission a petition for recision of the claim if it is determined the claimed mare is pregnant and the agreement concerning the stallion service certificate was not deposited as required by this section. An in-foal filly or mare shall be eligible to be entered into a claiming race only if the following conditions are fulfilled:

- (1) Full disclosure of such fact is on file with the racing secretary and such information is posted in his/her office;
- (2) The stallion service certificate has been deposited with the racing secretary's office and attached to the horse's foal registration certificate;
- (3) All payments due for the service in question and for any live progeny resulting from that service are paid in full.
- (4) No filly or mare in foal may race, in a claiming race, after the fifth month of pregnancy.

NEW SECTION

WAC 260-60-410 Claimed horse-In whose interest run-Delivery and passage of title. Every horse claimed shall run in the interest and for the account of the owner who entered it in the race, but title to the claimed horse shall be vested in the successful claimant from time said horse becomes a "starter". Henceforth, the successful claimant shall become the owner of the horse, whether it be alive or dead, sound or unsound, or injured during the race or after it. Transfer of possession of a claimed horse shall take place immediately after the race has been run unless otherwise directed by the stewards. If the horse is required to be taken to the test barn for post-race testing, the successful claimant or his/her representative shall maintain physical custody of the claimed horse. However, the original owner, trainer or his/her representative shall accompany the horse, observe the testing procedure and sign the test sample tag.

NEW SECTION

WAC 260-60-420 Claimed horse—Refusal to deliver. No person shall refuse to deliver to the person legally entitled thereto a horse claimed out of a claiming race, and furthermore, the horse in question shall be disqualified until delivery is made.

NEW SECTION

WAC 260-60-430 Claimed horse—Subsequent entry. A claimed horse, which won the race from which it was claimed, shall not enter for thirty days after being claimed in a race in which the determining eligibility price is less than 25% more than the price at which the horse was claimed. The day claimed shall not count but the following calendar day shall be the first day and the horse shall be entitled to enter whenever necessary so the horse may start on the 31st calendar day following the claim for any claiming price. This provision shall not apply to starter handicaps in which the weight to be carried is assigned by the handicapper.

NEW SECTION

WAC 260-60-440 Claimed horse—Subsequent sale or transfer—Retention by owner. If a horse is claimed it shall not be sold or transferred to anyone wholly or in part, except in a claiming race, for a period of 30 days from date of claim, nor shall it, unless reclaimed, remain in the same stable or under the control or management of its former owner or trainer for a like period.

NEW SECTION

WAC 260-60-450 Claimed horse—Title recognized according to rules of meeting. When a horse is claimed at a recognized meeting under rules which are at variance with these rules, title to such horse shall be recognized in Washington to follow the rules of the meeting under which the claim was made.

NEW SECTION

WAC 260-60-460 Cancellation of claims. If within thirty days from the running of the race, in which a horse is claimed, the stewards find that a claim was made in violation of the rules of racing the stewards may disallow and cancel any such claim and order the return of the horse and the claim payment. In deciding whether to cancel a claim the stewards shall consider which party was at fault, the status of the horse at the time the claiming violation is discovered, and such other factors as appropriate. Should the stewards cancel a claim, they may order, as appropriate, payment for the care and maintenance of the horse involved. The stewards may refer to the commission for further action any case involving a violation of the rules of racing with respect to a claim regardless of whether the stewards deem it appropriate to order the cancellation of the claim.

NEW SECTION

WAC 260-60-470 Rules apply to all races. These rules shall apply to all races under the jurisdiction of the commission.

Changes Other than Editing from Proposed to Adopted Version: The proponents, Puget Sound pilots, sought to increase the 1995 tariff by 13.65% in all categories except transportation. This proposal was not adopted for the 1996 tariff.

The proponents sought to reduce the "delinquent payment charge" period from forty-five days to thirty days. This proposal was not adopted for the 1996 tariff.

The proponents sought to increase the "sailing delay charge" by doubling the hourly rate after the first three hours of delay. This proposal was not adopted for the 1996 tariff.

The proponents sought to change the title of "super ships" to "tonnage charges" and charge \$0.0114 per gross ton for all vessels between "0 to 20,000 gross tons." This proposal was adopted for the 1996 tariff, except that the gross ton charge for all vessels between "0 to 20,000 gross tons" was set at \$0.0060, \$0.0054 less than the proposed rate.

The adopted version reflects the same rate as the 1995 tariff, except for the change to "tonnage charges" discussed in the preceding paragraph. Due to adoption of the "0 to 20,000 gross tons" classification and a gross tonnage charge of \$0.0060 per gross ton, with no other changes to the 1995 tariff, there is an effective increase in projected 1996 revenues of 7.860% over 1995 revenues.

AMENDATORY SECTION (Amending WSR 92-03-026, filed 1/8/92, effective 2/8/92)

WAC 458-20-199 Accounting methods. (1) Introduction. In computing tax liability under the business and occupation tax and the retail sales tax, one of the following accounting methods ((should)) must be used. This is true for all businesses, whether their activity involves the sale of tangible personal property or the rendering of services. (See WAC 458-20-197 for an explanation of when tax liability arises under the accrual method versus the cash receipts method.)

(2) Method one, cash basis. A taxpayer may file excise tax returns in each reporting period with figures based upon cash receipts only if the taxpayer's ((regular)) books of account are regularly kept on a ((strietly)) cash receipts basis. (See RCW 82.04.090.) A taxpayer whose books of account recognize income at the time a sale is made or a service is rendered, regardless of when payment is received, is keeping its records on an accrual basis and must report and pay tax on the accrual basis. For those ((businesses)) taxpayers who maintain formal accounting records, the department of revenue will generally look to the revenue accounts of the general ledger of the ((business)) taxpayer and to the method of accounting used for reporting of federal income taxes to determine when the income is recognized. However, all records of the ((business)) taxpayer will be considered by the department in determining whether the records are being kept on an accrual basis, particularly for those ((businesses which)) taxpayers who do not maintain formal records such as a general ledger.

The fact that a taxpayer makes sales "on account" and has records to identify the accounts receivable does not preclude the taxpayer from reporting on a cash receipts basis. Taxpayers can have accounts receivable and still report on the cash basis, provided the accounting records, such as the general ledger or federal income tax returns, do not record the sales on account as income until the cash is

actually received. If a taxpayer keeps a general ledger on an accrual basis and federal income tax returns on a cash basis, the taxpayer may elect to report state tax returns on either the cash basis or the accrual basis. However, once a reporting basis is selected, the reporting basis may not be changed without authorization from the department unless the method for reporting federal taxes changes or the method used in keeping the records changes. A taxpayer who maintains its records throughout the year on a cash basis, including a general ledger, and elects to make a worksheet adjustment at year-end to report federal taxes on an accrual basis, will be permitted to report state taxes on a cash basis.

- (3) Method two, accrual basis. A taxpayer who does not regularly keep books of account on a ((strictly)) cash receipts basis must file returns with figures based on the accrual method. These taxpayers must report the gross proceeds from all cash sales made in the tax reporting period in which the sales are made, together with the total amount of charge sales during such period. The law does not require a taxpayer to use a particular accounting system. However, the taxpayer must report based on the system of accounting used by the business, regardless of the taxpayer's reasons for selecting a particular accounting system. ((For example, if a taxpayer reports to the federal government on a eash basis, but maintains accounting records on an accrual basis, the taxpayer is still obligated to report the excise taxes to the state on the accrual basis.)) It will be presumed that a taxpayer who is permitted under federal law or regulations to report its federal income taxes on a cash basis and does do so is maintaining the records on a cash basis. A taxpayer who maintains a general ledger on an accrual basis and files federal tax returns on an accrual basis must also report state tax returns on an accrual basis.
- (a) Taxpayers who make installment sales or leases of tangible personal property must use the accrual method when they compute their tax liability. (See RCW 82.08.090, WAC 458-20-198 and 458-20-211.)
- (b) In the case of rentals or leases, the income is considered to have accrued to the seller in the tax reporting period in which the seller is entitled to receive the rental or lease payment.
- (4) Constructive receipt. "Constructive receipt" means income that a cash basis taxpayer is entitled to receive, but will not receive because of an action taken by the taxpayer. Constructive receipts are taxable in the tax reporting period in which the taxpayer gives up the entitlement to actual future receipt of the income. The following examples show how this applies to a cash basis taxpayer.
- (a) XYZ has \$10,000 in accounts receivable which XYZ expects to collect over the next six months. XYZ elects to sell these accounts receivable for eighty percent of their face value. Even though the taxpayer only receives \$8,000 from the sale of the accounts receivable, XYZ is taxable on the full \$10,000 because it has taken constructive receipt of the full \$10,000 by taking an action to give up entitlement to the \$2,000.
- (b) XYZ has \$1,500 in accounts receivable from customers who are delinquent in making payment. XYZ turns these accounts receivable over to a collection agency with the understanding that the collection agency may keep half of whatever is collected. The collection agency over the next month collects \$500 and keeps \$250 of this amount for

its services. XYZ is taxable on the full \$500 collected by the collection agency. XYZ has constructive receipt of this amount and the \$250 retained by the collection agency is a cost of doing business to the taxpayer.

(c) XYZ is involved in a bankruptcy proceeding. The receipt of cash from accounts receivable will be placed in an escrow account. These funds will be used to pay creditors and a portion of these amounts will be given to the taxpayer. The full amount of the accounts receivable collected and going into the escrow is taxable income to XYZ. XYZ has received the full benefit of the cash received from the accounts receivable through payment of XYZ's creditors.

Commissioner of Public Lands

NEW SECTION

WAC 222-10-040 Class IV-Special threatened and endangered species SEPA policies. In addition to the SEPA policies established elsewhere in this chapter, the following policies shall apply to Class IV-Special forest practices involving threatened or endangered species.

- (1) The department shall consult with the department of fish and wildlife, other agencies with expertise, affected landowners, affected Indian tribes, and others with expertise when evaluating the impacts of forest practices. If the department does not follow the recommendations of the department of fish and wildlife, the department shall set forth in writing a concise explanation of the reasons for its action.
- (2) In order to determine whether forest practices are likely to have a probable significant adverse impact, and therefore require an environmental impact statement, the department shall evaluate whether the forest practices reasonably would be expected, directly or indirectly, to reduce appreciably the likelihood of both the survival or recovery of a listed species in the wild by reducing the reproduction, numbers, or distribution of that species.
- (3) Specific mitigation measures or conditions shall be designed to reduce any probable significant adverse impacts identified in subsection (2) of this section.
- (4) The department shall consider the species-specific policies in WAC 222-10-041 when reviewing and evaluating SEPA documents and the impacts of forest practices.

NEW SECTION

WAC 222-10-041 Northern spotted owls. The effective date of this section is July 1, 1996. The following policies shall apply to forest practices subject to SEPA if the forest practices may cause adverse impacts to northern spotted owls.

- (1) In SOSEAs or areas of SOSEAs where the goal is demographic support, suitable spotted owl habitat should be maintained either to protect the viability of the owl(s) associated with each northern spotted owl site center or to provide demographic support for that particular SOSEA as described in the SOSEA goals.
- (2) In SOSEAs or areas of SOSEAs where the goal is dispersal support, either suitable spotted owl habitat

should be maintained to protect the viability of the owl(s) associated with each northern spotted owl site center or dispersal habitat should be managed, over time, to provide the dispersal support for that particular SOSEA as described in the SOSEA goals. Dispersal support is provided by a landscape which includes dispersal habitat at the stand level interspersed with areas of higher quality habitat. Stands of dispersal habitat should be managed to reduce gaps between stands and to maintain a sufficient level of dispersal habitat to meet the SOSEA goals over time.

- (3) In SOSEAs or areas of SOSEAs where the goal is a combination of dispersal support and demographic support, either suitable spotted owl habitat should be maintained to protect the viability of the owl(s) associated with each northern spotted owl site center or a variety of habitat conditions should be provided which in total are more than dispersal support and less than demographic support. This can be accomplished by providing:
- (a) Dispersal support as described in subsection (2) of this section:
- (b) Areas of suitable spotted owl habitat that contain some opportunities for nesting as well as roosting and foraging habitat; and
- (c) Connectivity between areas of SOSEAs designated for demographic support or adjacent federal lands which are designated as late successional reserves, congressionally reserved areas, or administratively withdrawn areas.
- (4) Within SOSEAs, the following amounts of suitable habitat are generally assumed to be necessary to maintain the viability of the owl(s) associated with each northern spotted owl site center, in the absence of more specific data or a mitigation plan, as provided for in subsections (6) and (7) of this section respectively:
- (a) All suitable spotted owl habitat within 0.7 mile of each northern spotted owl site center;
- (b) Including the suitable spotted owl habitat identified in (a) of this subsection:
- (i) For the Hoh-Clearwater/Coastal Link SOSEA A total of 5,863 acres of suitable spotted owl habitat within the median home range circle (2.7 mile radius).
- (ii) For all other SOSEAs A total of 2,605 acres of suitable spotted owl habitat within the median home range circle (1.8 mile radius).

The department shall first identify the highest quality suitable spotted owl habitat for this purpose. Consideration shall be given to habitat quality, proximity to the activity center and contiguity in selecting the most suitable habitat. Suitable spotted owl habitat identified outside 0.7 mile of a northern spotted owl site center may support more than one median home range circle.

Suitable spotted owl habitat harvested by a landowner shall continue to be counted as part of the total acres necessary under (b) of this subsection for other landowners within the median home range circle if the harvest is conducted pursuant to agreements or plans approved under subsection (6) of this section or WAC 222-16-080 (1)(h)(iv), (6)(a), (b), or (e).

(5) Outside SOSEAs, during the nesting season (between March 1 and August 31), seventy acres of the highest quality suitable spotted owl habitat surrounding a northern spotted owl site center should be maintained. The

seventy acres for one site center shall not be utilized for meeting suitable habitat needs of any other site center.

- (6) The assumptions set forth in subsection (4) of this section are based on regional data. Applicants or others may submit information that is more current, accurate, or specific to a northern spotted owl site center, proposal, or SOSEA circumstances or goals. The department shall use such information in making its determinations under this section where the department finds, in consultation with the department of fish and wildlife, that the information is more likely to be valid for the particular circumstances than the assumptions established under subsection (4) of this section. If the department does not use the information, it shall explain its reasons in writing to the applicant.
- (7) The department shall consider measures to mitigate identified adverse impacts of an applicant's proposal. Mitigation measures must contribute to the achievement of SOSEA goals or to supporting the viability of impacted northern spotted owl site centers.

AMENDATORY SECTION (Amending WSR 94-17-033, filed 8/10/94, effective 8/13/94)

- (i) Use the best science and management advice available;
 - (ii) Use a landscape approach to wildlife protection;
- (iii) Be designed to avoid the potential for substantial impact to the environment;
- (iv) Protect known populations of threatened and endangered species of wildlife from negative effects of forest practices consistent with RCW 76.09.010; and
- (v) Consider and be consistent with recovery plans adopted by the department of <u>fish and</u> wildlife pursuant to RCW 77.12.020(6) or habitat conservation plans or 16 U.S.C. 1533(d) rule changes of the Endangered Species Act.
- (((7))) (6) Regardless of any other provision in this section, ((the following are not critical wildlife habitats (state) or critical habitats (federal) for the particular species:

eonsistent with that plan and permit; or)) forest practices applications shall not be classified as Class IV-Special based on critical wildlife habitat (state) (WAC 222-16-080(1)) or critical habitat (federal) (WAC 222-16-050 (1)(b)(ii)) for a species if the forest practices are consistent with one of the following proposed for protection of the species:

- (a) A habitat conservation plan and permit or an incidental take statement covering such species approved by the Secretary of the Interior or Commerce pursuant to 16 U.S.C. §1536 (b) or 1539 (a); an "unlisted species agreement" covering such species approved by the U.S. Fish and Wildlife Service or National Marine Fisheries Service; or a "no-take letter" or other cooperative or conservation agreement entered into with a federal or state fish and wildlife agency pursuant to its statutory authority for fish and wildlife protection that addresses the needs of the affected species and that is subject to review under the National Environmental Protection Act, 42 U.S.C. §4321 et seq., or the State Environmental Policy Act, chapter 43.21C RCW, as applicable;
- (b) ((Forest practices covered by)) A rule adopted by the U.S. Fish and Wildlife Service for the conservation of a particular threatened species pursuant to 16 U.S.C. 1533(d);

- subsection. Old forest habitat is the highest quality. followed in descending order by sub-mature habitat and young forest marginal habitat.
- (a) Old forest habitat means habitat that provides for all the characteristics needed by northern spotted owls for nesting, roosting, foraging, and dispersal, described as stands with:
- (i) A canopy closure of 60% or more and a layered, multispecies canopy where 50% or more of the canopy closure is provided by large overstory trees (typically, there should be at least 75 trees greater than 20 inches dbh per acre, or at least 35 trees 30 inches dbh or larger per acre); and
- (ii) Three or more snags or trees 20 inches dbh or larger and 16 feet or more in height per acre with various deformities such as large cavities, broken tops, dwarf mistletoe infections, and other indications of decadence; and

WAC 222-16-100 Planning options for the northern spotted owl. (1) Landowner option plans for the northern spotted owl. Landowner option plans (LOPs) are intended to provide landowners with a mechanism, entered into voluntarily, to contribute to the protection of northern spotted owls by considering the needs of overall population maintenance or dispersal habitat across a defined geographic area. Forest practices applications that are in an area covered by an LOP, and that are consistent with the LOP, will not be classified as Class IV-Special on the basis of critical wildlife habitat (state) or critical habitat (federal) for the northern spotted owl. This does not preclude classification as Class IV-Special because of the presence of other factors listed in WAC 222-16-050(1).

- (a) Required elements of LOPs. The level of detail to be included in a LOP will depend on the area of ownership involved, the time period for which the plan will be in effect, and the complexity of the management strategy. Nevertheless, each plan shall contain the elements set forth in this subsection.
- (i) Goals and objectives. The specific goals and objectives for the landowner's contributions proposed under the LOP shall be developed by the landowner and approved by the department in consultation with the department of fish and wildlife based on the following:
- (A) Mitigation under the plan must be reasonable and capable of being accomplished;
- (B) To the maximum extent practicable, the plan must minimize and mitigate significant adverse impacts caused by, and identified in, the plan on individual northern spotted owl site centers or the ability of the SOSEA to meet SOSEA goals. Specific short (one to five-year) and long (greater than five-year) term goals and objectives for the LOP should be clearly stated, where applicable; and
- (C) LOPs should be designed to achieve an appropriate contribution from nonfederal lands toward meeting SOSEA goals and are intended to be an efficient and effective alternative to site-by-site management planning. In Eastern Washington, LOPs must also consider the need to protect the forests from catastrophic loss from wildfire, insects, and diseases.
 - (ii) Other required elements:
- (A) A description of the planning area. The LOP planning area shall include a sufficient amount of the landowner's forest land within the SOSEA to meet the goals and objectives of the plan.
- (B) A description of the physical features in the planning area (e.g., geology, topography, etc.).
- (C) The current habitat status. Suitable spotted owl habitat should be categorized and mapped as old forest, submature, young forest marginal, or dispersal.
- (D) The current species status. All status 1, 2, and 3 northern spotted owl site centers and the associated median home range circles that overlap any of the landowner's ownership within the LOP boundary must be mapped.
- (E) Management proposals and relevant operations plans.
 - (F) Projected suitable habitat development.
 - (G) A plan for training.
 - (H) A monitoring program.

- (I) Reporting standards.
- (J) The conditions under which the LOP may be modified.
- (K) The term of the LOP and conditions for termination. The term of the LOP shall be sufficient to meet its goals and objectives. The conditions of the LOP run with the land unless the LOP specifies alternative means to achieve the LOP goals and objectives upon mid-term sale or transfer. In addition to any other termination provisions in the LOP, plans may be terminated by mutual agreement of the landowner and the department.
- (b) Approval of LOPs. Upon receipt of a landowner option plan, the department shall circulate the plan to the department of fish and wildlife, affected Indian tribes, local government entities, other forest landowners in the SOSEA, and the public for a thirty-day review and comment period. The department may extend this review period for up to thirty additional days. Within ninety days of receipt of the plan, the department shall review the comments and approve or disapprove the plan or submit the plan to the landowner to revise as appropriate. The department, after consultation with the department of fish and wildlife, shall approve the plan if:
- (i) The plan contains all of the elements required under this section;
- (ii) The plan is expected to be effective in meeting its goals and objectives;
- (iii) The plan will not have a probable significant adverse impact on the ability of the SOSEA to meet its goals; and
- (iv) The plan will not appreciably reduce the likelihood of the survival and recovery of the northern spotted owl in the wild.

In making its determination under this subsection, the department shall consider the direct, indirect, and cumulative effects of the plan; both the short-term and long-term effects of the plan; and whether local, state, or federal land management, regulatory, or nonregulatory requirements will mitigate identified significant adverse impacts. If the department does not approve the plan, or approves it over the objections of the department of fish and wildlife, the department shall set forth in writing a concise explanation of the reasons for its action.

- (c) Enforcement of LOPs. The department shall review all applications and notifications from the landowner, proposed within the plan area, for consistency with the plan. Any applications or notifications found to be inconsistent with the plan shall be returned to the landowner for modification. After landowner review, applications and notifications which are not consistent with the plan shall be classified as Class IV-Special.
- (2) Cooperative northern spotted owl habitat enhancement agreements.
- (a) Purpose. A cooperative northern spotted owl habitat enhancement agreement (CHEA) is intended to remove disincentives for landowners who create, enhance, or maintain habitat for the northern spotted owl by providing them with a "safe harbor" against future spotted owl regulation caused by their enhancement activities. A CHEA is an agreement between the department and a landowner, developed in cooperation with the department of fish and wildlife, for the purpose of creating, enhancing, or maintaining

northern spotted owl habitat. The agreement will apply only to forest land identified by the landowner, outside of the median home range circles of northern spotted owl site centers in existence at the time of implementation.

- (b) Authority. Outside of the median home range circles of northern spotted owls, the department, in consultation with the department of fish and wildlife, may enter into agreements with nonfederal landowners to create, enhance, or maintain habitat that the northern spotted owl can be expected to utilize. During the term of these agreements, forest practices covered by the agreements shall not be classified as Class IV-Special on the basis of critical wildlife habitat (state) or critical habitat (federal) for the northern spotted owl. This does not preclude classification as Class IV-Special because of the presence of other factors listed in WAC 222-16-050(1).
- (c) Baseline. Each agreement shall identify a baseline level of habitat, and the department shall not permit forest practices that reduce the habitat below the baseline during the term of the agreement. The baseline may range from zero habitat to the overall levels of suitable spotted owl habitat and dispersal habitat that existed across the land in question at the time the agreement is entered into. The department shall determine, working with the landowner and in consultation with the department of fish and wildlife, the appropriate baseline, taking into consideration:
- (i) The size of the landowner's ownership and the ability of the landowner to maintain habitat conditions across the landscape in question over time;
- (ii) The overall benefits of the agreement to the northern spotted owl including both the proposed measures to create, enhance, or maintain habitat and the proposed baseline levels; and
 - (iii) The term of the agreement.
- (d) Form and content of CHEAs. The department shall, in consultation with the department of fish and wildlife, have the authority to define the form and contents of CHEAs. The form and contents may vary among agreements, but each must provide sufficient information for the department, the public, and other reviewers to understand and evaluate the agreement against the standards established under this subsection (2). In addition to the elements required by the department, each agreement shall include a plan to avoid harvesting, road construction, or the aerial application of pesticides, between March 1 and August 31, on the seventy acres of highest quality suitable spotted owl habitat surrounding any known northern spotted owl site centers on lands covered by the agreement.
- (e) Approval of a CHEA. Upon receipt of a CHEA, the department shall circulate the agreement to the department of fish and wildlife, affected Indian tribes, local government entities, other forest landowners in the SOSEA (if the CHEA is in a SOSEA), and the public for review and comment. Within sixty days of receipt of the agreement, the department shall review the comments and approve or disapprove the agreement or submit the agreement to the landowner to revise as appropriate. The department, after consultation with the department of fish and wildlife, may approve the agreement if the agreement will create, enhance, or maintain habitat conditions for the northern spotted owl in a manner that provides a measurable contribution toward

meeting the goals of the SOSEA or a measurable benefit to northern spotted owls outside SOSEAs.

(f) Enforcement of CHEAs. The department shall review all applications and notifications from the landowner, proposed within the agreement area, for consistency with the agreement. Any applications or notifications found to be inconsistent with the agreement shall be returned to the landowner for modification. After landowner review, applications and notifications which are not consistent with the agreement shall be classified based on the rules in effect at the time of application and without any of the benefits of the agreement.

AMENDATORY SECTION (Amending WSR 92-23-056, filed 11/17/92, effective 12/18/92)

WAC 222-24-030 Road construction. (1) Right of way timber. Merchantable right of way timber shall be removed or decked in suitable locations where the decks will not be covered by fill material or act as support for the fill or embankment.

- *(2) Debris burial.
- (a) In permanent road construction, do not bury:
- (i) Loose stumps, logs or chunks containing more than 5 cubic feet in the load-bearing portion of the road, except as puncheon across wetlands or for culvert protection.
- (ii) Any significant amount of organic debris within the top 2 feet of the load-bearing portion of the road, except as puncheon across wetlands or for culvert protection.
- (iii) Excessive accumulation of debris or slash in any part of the load-bearing portion of the road fill, except as puncheon across wetlands or for culvert protection.
- (b) In the cases where temporary roads are being constructed across known areas of unstable soils and where possible construction failure would directly impact waters, the requirements in (a), (i), (ii) and (iii) of this subsection shall apply. A temporary road is a roadway which has been opened for the purpose of the forest practice operation in question, and thereafter will be an inactive or abandoned road.
- (3) Compact fills. During road construction, fills or embankments shall be built up by layering. Each layer shall be compacted by operating the tractor or other construction equipment over the entire surface of the layer. Chemical compacting agents may be used in accordance with WAC 222-38-020.
- *(4) Stabilize soils. When soil, exposed by road construction, appears to be unstable or erodible and is so located that slides, slips, slumps, or sediment may reasonably be expected to enter Type 1, 2, 3 or 4 Water and thereby cause damage to a public resource, then such exposed soil areas shall be seeded with grass, clover, or other ground cover, or be treated by erosion control measures acceptable to the department. Avoid introduction of nonnative plant species, as listed in the board manual, to wetlands and wetland management zones.
- *(5) Channel clearance. Clear stream channel of all debris and slash generated during operations prior to the removal of equipment from the vicinity, or the winter season, whichever is first.
 - *(6) Drainage.

- (a) All required ditches, culverts, cross drains, drainage dips, water bars, and diversion ditches shall be installed concurrently with the construction of the roadway.
- (b) Uncompleted road construction to be left over the winter season or other extended periods of time shall be drained by outsloping or cross draining. Water bars and/or dispersion ditches may also be used to minimize eroding of the construction area and stream siltation. Water movement within wetlands must be maintained.
- *(7) Moisture conditions. Construction shall be accomplished when moisture and soil conditions are not likely to result in excessive erosion and/or soil movement, so as to avoid damage to public resources.
- *(8) End haul/sidecasts. End haul or overhaul construction is required where significant amounts of sidecast material would rest below the 50-year flood level of a Type 1, 2, 3, or 4 Water, within the boundary of a Type A or Type B Wetland or wetland management zones or where the department determines there is a potential for mass soil failure from overloading on unstable slopes or from erosion of side cast material causing damage to the public resources.
- *(9) Waste disposal. When spoil, waste and/or other debris is generated during construction, this material shall be deposited or wasted in suitable areas or locations and be governed by the following:
- (a) Spoil or other debris shall be deposited above the 50-year flood level of Type 1, 2, 3, or 4 Waters or in other locations so as to prevent damage to public resources. The material shall be stabilized by erosion control measures as necessary to prevent the material from entering the waters.
- (b) All spoils shall be located outside of Type A and Type B Wetlands and their wetland management zones. Spoils shall not be located within the boundaries of forested wetlands without written approval of the department and unless a less environmentally damaging location is unavailable. No spoil area greater than 0.5 acre in size shall be allowed within wetlands.
- (10) **Disturbance avoidance.** Road construction, operation of heavy equipment and blasting within a SOSEA boundary shall not be allowed within 0.25 mile of a northern spotted owl site center between March 1 and August 31, provided that, this restriction shall not apply if:
- (a) The landowner demonstrates that the owls are not actively nesting during the current nesting season; or
- (b) The forest practice is operating in compliance with a plan or agreement developed for the protection of the northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-30-050 Felling and bucking. *(1) Falling along water.

(a) No trees will be felled into Type 1, 2 and 3 Waters, or Type A or B Wetlands except trees which cannot practically and safely be felled outside the stream, lake or pond using techniques in general use and these trees must then be removed promptly.

Such felling and removing in Type 1, 2 or 3 Waters shall comply with the hydraulic project approval of the departments of fisheries or wildlife.

- (b) Within riparian management zones, and wetland management zones fall trees favorable to the lead consistent with safety standards to yard or skid away from the waters. The use of directional falling, lining, jacking and staged falling techniques are encouraged.
- (c) Trees may be felled into Type 4 Water if logs are removed as soon thereafter as practical. See forest practices board manual guidelines for clearing slash and debris from Type 4 and 5 Water.

*(2) Bucking in water.

- (a) No bucking or limbing shall be done on trees or portions thereof lying between the banks of Type 1, 2 or 3 Waters or in open water areas of Type A Wetlands, except as necessary to remove the timber from the water.
- (b) Where bucking or limbing is done between the banks of a Type 4 Water, care shall be taken to minimize accumulation of slash in the water.
- *(3) Falling near riparian management zones, wetland management zones and setting boundaries. Reasonable care shall be taken to avoid felling trees into riparian management zones, wetland management zones and areas outside the harvest unit.
- (4) Falling in selective and partial cuts. Reasonable care shall be taken to fall trees in directions that minimize damage to residual trees.
- (5) Disturbance avoidance. Felling and bucking within a SOSEA boundary shall not be allowed within 0.25 mile of a northern spotted owl site center between March 1 and August 31 provided that, this restriction shall not apply if:
- (a) The landowner demonstrates that the owls are not actively nesting during the current nesting season; or
- (b) The forest practice is operating in compliance with a plan or agreement developed for the protection of the northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

- WAC 222-30-060 Cable yarding. *(1) Type 1, 2 and 3 Waters. No timber shall be cable yarded in or across a Type 1, 2 or 3 Waters except where the logs will not materially damage the bed of waters, banks or riparian management zones and removals from Type 1, 2 or 3 Water have hydraulic project approval of the departments of fisheries or wildlife.
- *(2) Type A or B Wetlands. No timber shall be cable yarded in or across Type A or B Wetlands without written approval from the department.

- *(4) Yarding in riparian management zones and wetland management zones. Where timber is yarded from or across a riparian management zone, or wetland management zone reasonable care shall be taken to minimize damage to the vegetation providing shade to the stream or open water areas and to minimize disturbance to understory vegetation, stumps and root systems. Where practical and consistent with good safety practices, logs shall be yarded in the direction in which they lie and away from Type A or B

Wetlands or Type 1, 2 and 3 Waters until clear of the wetland management zone or riparian management zone.

- (5) Direction of yarding.
- (a) Uphill yarding is preferred.
- (b) Where downhill yarding is used, reasonable care shall be taken to lift the leading end of the log to minimize downhill movement of slash and soils.
- *(c) When yarding parallel to a Type 1, 2 or 3 Water channel below the 50-year flood level or within the riparian management zone, reasonable care shall be taken to minimize soil disturbance and to prevent logs from rolling into the stream, lake, pond, or riparian management zone.
- (6) Disturbance avoidance. The operation of heavy equipment within a SOSEA boundary shall not be allowed within 0.25 mile of a northern spotted owl site center between March 1 and August 31 provided that, this restriction shall not apply if:
- (a) The landowner demonstrates that the owls are not actively nesting during the current nesting season; or
- (b) The forest practice is operating in compliance with a plan or agreement developed for the protection of the northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

NEW SECTION

- WAC 222-30-065 Helicopter yarding. Helicopter operations within a SOSEA boundary shall not be allowed within 0.25 mile of a northern spotted owl site center between March 1 and August 31, provided that, this restriction shall not apply if:
- (1) The landowner demonstrates that the owls are not actively nesting during the current nesting season; or
- (2) The forest practice is operating in compliance with a plan or agreement developed for the protection of the northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-30-070 Tractor and wheeled skidding systems. *(1) Typed waters and wetlands.

- (a) Tractor and wheeled skidders shall not be used in Type 1, 2 or 3 Water, except with approval by the department and with a hydraulic project approval of the departments of fisheries or wildlife.
- (b) In order to maintain wetland water movement and water quality, and to prevent soil compaction, tractor or wheeled skidders shall not be used in Type A or B Wetlands without prior written approval of the department.
- (c) Within all wetlands, tractors and wheeled skidder systems shall be limited to low impact harvest systems. Ground based logging systems operating in wetlands shall only be allowed within wetlands during periods of low soil moisture or frozen soil conditions.
- (d) Skidding across any flowing Type 4 Water shall be minimized and when done, temporary stream crossings shall be used, if necessary, to maintain stream bed integrity.
- (e) Whenever skidding in or across any type water, the direction of log movement between stream banks shall be as close to right angles to the stream channel as is practical.
 - *(2) Riparian management zone.

- (a) Logging will be permitted within the zone. However, any use of tractors, wheeled skidders, or other yarding machines within the zone must be as described in an approved forest practices application or otherwise approved in writing by the department.
- (b) Where skidding in or through the riparian management zone is necessary, the number of skidding routes through the zone shall be minimized.
- (c) Logs shall be skidded so as to minimize damage to leave trees and vegetation in the riparian management zone, to the extent practical and consistent with good safety practices.
 - *(3) Wetlands management zones.
- (a) Logging will be permitted within wetland management zones.
- (b) Where feasible logs shall be skidded at least with one end suspended from the ground so as to minimize soil disturbance and damage to leave trees and vegetation in the wetland management zone.
- (c) Tractors, wheeled skidders, or other ground based harvesting systems shall not be used within the minimum WMZ width without written approval of the department.
- *(4) **Deadfalls.** Logs firmly embedded in the bed or bank of Type 1, 2, 3 or 4 Waters shall not be removed or unnecessarily disturbed without hydraulic project approval of the departments of fisheries or wildlife.
- *(5) Moisture conditions. Tractor and wheeled skidders shall not be used on exposed erodible soils or saturated soils when soil moisture content is so high that unreasonable soil compaction, soil disturbance, or wetland, stream, lake or pond siltation would result.
- (6) Protection of residual timber. Reasonable care shall be taken to minimize damage from skidding to the stems and root systems of residual timber and to young reproduction.
 - *(7) Skid trail construction.
- (a) Skid trails shall be kept to the minimum feasible width.
- (b) Reasonable care shall be taken to minimize the amount of sidecast required and shall only be permitted above the 50-year flood level.
- (c) Skid trails shall be outsloped where practical, but be insloped where necessary to prevent logs from sliding or rolling downhill off the skid trail.
- *(8) Skid trail maintenance. Upon completion of use and termination of seasonal use, skid trails on slopes in exposed soils shall be water barred where necessary to prevent soil erosion.
- *(9) Slope restrictions. Tractor and wheeled skidders shall not be used on slopes where in the opinion of the department this method of operation would cause unnecessary or material damage to a public resource.
- (10) Disturbance avoidance. The operation of heavy equipment within a SOSEA boundary shall not be allowed within 0.25 mile of a northern spotted owl site center between March 1 and August 31, provided that, this restriction shall not apply if:

northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-30-100 Slash disposal or prescribed burning. (1) Slash disposal techniques:

- *(a) Any conventional method of slash disposal may be used, except in Type A or B Wetlands, wetland management zones, and riparian management zones and on sites where the department determines that a particular method would cause unreasonable risk to public resources or unreasonably damage site productivity. Conventional methods of slash disposal include the following: Controlled broadcast burning; pile or windrow and burn; pile or windrow without burning; mechanical scatter and compaction; scarification; chip, mulch or lop and scatter; burying; and physical removal from the forest lands: Provided, That on land shown to have low productivity potential the landowner or operator shall obtain the department's approval of its regeneration plan prior to utilizing controlled broadcast burning as a slash disposal technique. In riparian management zones, slash disposal shall be by hand, unless approved by the department. Scarification shall not be allowed within wetlands. Machine piling is discouraged in wetlands.
- (b) All slash burning requires a burning permit from the department which provides for compliance with the smoke management plan and reasonable care to protect Type A and B Wetlands, wetland management zones, riparian management zones, soil, residual timber, public resources, and other property.
- *(c) Location of slash piles. Except where burning will be completed before the next ordinary high-water season, slash shall not be piled or windrowed below the 50-year flood level of any Type 1, 2, 3 or 4 Water or in locations from which it could be expected to enter any stream, lake or pond.
- (2) Slash isolation, reduction, or abatement is required when the department determines there is an extreme fire hazard according to law (see WAC 332-24-360).
- (3) Slash disposal is required where the forest landowner has applied for and been granted an extension of time for reforestation on the grounds that slash disposal is necessary or desirable before reforestation.
 - *(4) Removing slash and debris from streams.

"Slash" or "debris" which can reasonably be expected to cause significant damage to the public resource shall be removed from Type 1, 2, 3 or 4 Waters, to above the 50-year flood level and left in a location or manner minimizing risk of re-entry into the stream, lake or pond and if substantial accumulations of slash exist below the 50-year flood level of Type 1, 2, 3 or 4 Waters, slash disposal is required. See the forest practices board manual for "Guidelines for clearing slash and debris from Type 4 and 5 Waters."

- (b) The forest practice is operating in compliance with a plan or agreement developed for the protection of the northern spotted owl under WAC 222-16-080 (6)(a), (e), or (f).

WAC 296-17-420 General inclusions. All of the basic classifications in this manual, other than standard exceptions, include certain operations which would be classified separately if they were run as separate business undertakings. These operations are referred to as general inclusions and are included in the scope of each basic classification. The following operations are included in all basic classifications unless they are specifically excluded by the language of the basic classification.

- (1) Aircraft travel by employees, other than members of the flying crew.

AMENDATORY SECTION (Amending WSR 93-12-093, filed 5/31/93, effective 7/1/93)

WAC 296-17-440 Standard exceptions. ((The following employments referred to as standard exceptions are to be separately rated unless these employments are specifically included within the scope of a basic classification by use of words such as "including clerical office and outside sales." (Use of the words "clerical office" will also include draftsmen and use of the words "sales personnel" will also include collectors, messengers and corporate officers.) Provided that a division of a single employee's worker hours shall not be permitted between two standard exception classifications or between a standard exception elassification and a basic business classification except as provided in the general exclusion rules of this manual.

The standard exceptions are defined below:

(1) Clerical office employees are defined as those employees whose duties are confined to keeping the books or records of the employer, or conducting correspondence or who are engaged wholly in office work where such books or records are kept or where such correspondence is conducted,

having no other duty of any nature in or about the employer's premises. If any elerical office employee is exposed to any operative hazard of the business, their entire worker hours shall be assigned to the highest rated classification of work to which they are exposed. The elerical office classification shall be applied only to persons as herein described who are employed exclusively in separate buildings or on separate floors of buildings or in departments on such floors which are physically separated from all other work areas of the employer by structural partitions and within which no work is performed other than elerical office duties as defined in this paragraph.

- (2) Draftsmen will be considered to be clerical office employees when their duties are limited to office work only and who are engaged strictly as draftsmen in such a manner that they are not exposed to the operative hazard of the business. If any draftsman is exposed to any operative hazard of this business, their entire worker hours shall be assigned to the highest rated classification of work to which they are exposed.
- (3) "Sales personnel—outside" covered under risk classifications 6301, 6302, and 6303 are defined as those employees engaged in such duties away from the premises of the employer who sell or solicit new accounts or customers for the employer or who service existing accounts or customers for the employer. Provided that no employee shall be assigned to a sales classification code if their duties include delivery, even though they may also solicit or collect. Employees having delivery duties, even if they walk or use public transportation, shall be assigned to the basic classification of the employer.
- (4) Messengers will be considered sales employees, provided the following conditions are met:
- (a) The messenger is used solely by the employer in connection with the administration of the employer's business operation.
- (b) The operation is not provided to the public as a general delivery service.
- (e) The employer's basic classification does not include the standard exception classification designations.

If all the above conditions do not exist, any employee assigned such duties shall be assigned to the governing classification of the employer when multiple basic classifications are assigned or to the basic classification in the event an employer has only a single basic classification assigned.

(5) Corporate officers are defined as those employees of a corporation elected and empowered in accordance with the articles of incorporation or bylaws as officers of the corporation who are also shareholders and serve on the board of directors of the corporation and whose duties are limited to administrative, elerical office and outside sales activities for the corporations. Any corporate officer who performs any duty that relates directly to the operational activities of the business shall be assigned to the basic classification(s) of the employer applicable to the work being performed. A corporate officer engaged exclusively in outside sales shall be assigned classification 6303. In no event however will a corporate officer be assigned the clerical office classification 4904.

With the exceptions of occupations falling within any classification that specifically includes clerical office, inside

draftsmen or sales personnel, the following designated occupational classifications shall apply.

Classification 4904 clerical office employees including inside draftsmen.

Classification 6303 sales personnel, outside or away from the employers premises including collectors, counsellors, N.O.C., and messengers.

Classification 6301 automobile, truck, camper, trailer, mobile home, motorcycle and pleasure craft sales personnel.

Classification 6302 all door to door sales personnel.

Classification 7101 corporate officers.)) The policy (WAC 296-17-310) used by labor and industries to classify workers' compensation risks states in part that "... workers' compensation classification(s) are to be assigned to an employer based on the nature of the employer's business, not the separate employments or occupations of workers found within the employer's business. . .. " There are several exceptions to this general classification policy noted in WAC 296-17-310. One such exception relates to "standard exception" employments. These are types of employments (occupations) in which employees are not exposed to any operative hazards of their employer's business and because they are common to so many businesses special classifications and reporting rules have been established for them. Through the establishment of special classifications recognition can be made within the rating plan of less hazardous nature of the work being performed by these classes of workers. In addition this practice is consistent with recognized principles of workers' compensation insurance and provides greater rate payer equity to employers. Standard exception employments described in this rule are to be rated (classified) separately in all cases unless these employments are specifically included within the scope of the basic classification(s) assigned to an employer. For example classification 5301 (WAC 296-17-677) which applies to "accounting or bookkeeping firms" specifies that it includes clerical office work and outside sales activities. A business assigned this classification (5301) would not be permitted to use any of the standard exception classifications described in subsections (1) through (3) of this section since they are specifically included within the scope of the classification. When the words "including clerical office" appear in any basic classification it will also include "drafting employees" although they may not be specifically mentioned and the use of the words "sales personnel" in any basic classification will include "sales personnel - outside, messengers and corporate officers." Because standard exception employments (occupations) exclude exposure to the operative hazards of an employer's business a division of work time between a standard exception classification and a basic classification is not permitted except as otherwise provided in the general exclusion rules (WAC 296-17-430) of this manual. Any employee that is assigned any duty which exposes him or her to any operative hazard of the employer's business is to be assigned without a division of hours to the basic classification of the business when the employer has only a single basic classification assigned, or to the governing classification of the business when multiple basic classifications are assigned to the employer.

(1) Clerical office employees. Clerical office employees who are not specifically included in the basic classification(s) assigned to an employer may qualify to be reported

(classified) separately under standard exception classification 4904 (WAC 296-17-653) provided that all of the conditions set forth in (a) and (b) of this subsection are met:

(a) Definition of clerical office duties. The duties of a clerical office employee include answering telephones; handling correspondence; computer composition; creation or maintenance of financial, employment, personnel and payroll records; creation or maintenance of computer software; and technical drafting. Cashiering and telephone sales may qualify for this classification (4904) provided that the employee does not handle, show, demonstrate or deliver any of the products sold by the employer and does not provide any retail or wholesale customer service. Similarly the clerical office classification (4904) may still apply to an employee who is required to make bank deposits, pick up mail from or deliver mail to the post office or purchase supplies, provided that such an employee's primary work duties are clerical office duties as defined in this rule.

(b) Definition of a clerical office. A clerical office is a work area which is physically separated from all other work areas of the employer by walls, partitions or other physical barriers and wherein only clerical office work as described in (a) of this subsection is performed. Clerical offices are routinely found on separate floors of buildings or in physically separate buildings. A clerical office does not include any work area where inventory is located; any work area where products are displayed for sale; or any work area where the purchaser or customer brings the product to for payment. A clerical office must be distinguishable from all other work areas of the employer and must be free from all the operative hazards of the business.

Drafting employees who are not specifically included in the basic classification(s) assigned to an employer may qualify to be rated (classified) separately under standard exception classification 4904 (WAC 296-17-653) provided the work they are assigned is performed in a clerical office as defined in subsection (1)(b) of this section and the work consists exclusively of drafting work or clerical office duties as defined in subsection (1)(a) of this section. Any clerical office or drafting employee that is assigned any duty which exposes him or her to any operative hazard of the employer's business is to be assigned without a division of hours to the basic classification of the business when the employer has only a single basic classification assigned, or to the governing classification of the business when multiple basic classifications are assigned to the employer.

(2) Sales personnel - outside. Sales personnel - outside who are not specifically included in the basic classification(s) assigned to an employer may qualify to be reported (classified) separately under standard exception classification 6301 (296-17-696), classification 6302 (WAC 296-17-697), or classification 6303 (WAC 296-17-698) provided that all of the conditions set forth in (a) and (b) of this subsection are met:

(a) Definition of sales personnel - outside duties. The duties of a sales personnel - outside employee include soliciting new customers for the employer; servicing existing customer accounts; demonstrating and selling products; completing correspondence; placing orders; public relations; estimating and telephone sales. Although some of the work may be conducted within a clerical office the duties assigned to these standard exception classifications differ significantly

in that their principle duties of soliciting new customers, demonstrating products and sales is conducted primarily away from the employers premises or place of business.

- (b) Duties prohibited. No employee whose duties include any retail or wholesale customer service such as stocking of shelves, handling inventory, delivery of products, or merchandising of products being sold by the employer shall be assigned to standard exception classification 6301 (WAC 296-17-696), classification 6302 (WAC 296-17-697) or classification 6303 (WAC 296-17-698) even though such employee may have duties described in (a) of this subsection. Any employee whose duties include delivery of goods or products or the handling of merchandise is to be assigned without a division of hours to the basic classification of the business when the employer has only a single basic classification assigned, or to the governing classification of the business when multiple basic classifications are assigned to the employer.
- (c) Messengers outside. Just as a drafting employee may qualify to be rated separately as a clerical office employee, a messenger may qualify to be rated (classified) separately under standard exception classification 6303 (WAC 296-17-698) "sales personnel outside" provided that all of the conditions set forth in (b)(i) through (iii) of this subsection are met:
- (i) The messenger must be used exclusively by the employer in connection with the administration of the employer's business operation for the delivery of interoffice correspondence and/or mail, making deposits or similar duties.
- (ii) The messenger service is not provided as a service to the employer's customers or the public as a general or specialty delivery service.
- (iii) The employer's basic classification(s) does not include the standard exception designation.
- If all of the above conditions are not met, any employee assigned messenger duties is to be assigned to the basic classification of the business when the employer has only a single basic classification assigned or the governing classification of the business when multiple basic classifications are assigned.
- (3) Corporate officers. Corporate officers who are not specifically included in the basic classification(s) assigned to an employer may qualify to be reported (classified) separately under standard exception classification 7101 (WAC 296-17-754) provided that all of the conditions set forth in (a) and (b) of this subsection are met:
- (a) Definition of corporate officer. For purposes of this rule and classification 7101 (WAC 296-17-754) a corporate officer is defined as any employee who is elected and empowered in accordance with the articles of incorporation or bylaws of the corporation as an officer of the corporation, who is also a share holder in the corporation and serves on the corporation's board of directors.
- (b) Definition of corporate officer duties. The duties of a corporate officer rated (classified) under classification 7101 (WAC 296-17-754) include clerical duties as described in subsection (1)(a) of this section, outside sales duties as described in subsection (2)(a) of this section and administrative duties such as hiring staff, attending meetings, negotiating contracts and public relations work.

Any corporate officer who is exposed to any operative hazard of the business or who directly supervise employees that are exposed to any operative hazard of the business shall be assigned to the basic classification of the business when the employer has only a single basic classification assigned or to the governing classification of the business when multiple basic classifications are assigned to the employer. In the event that a corporate officer's duties are limited outside sales activities described under subsection (2)(a) of this section, such an employee may qualify to be rated (classified) separately under classification 6303 (WAC 296-17-698) provided that all of the other conditions set forth in subsection (2) of this section are met. Under no circumstance will classification 4904 (WAC 296-17-653) be assigned to any corporate officer as defined in this rule.

AMENDATORY SECTION (Amending WSR 90-13-018, filed 6/8/90, effective 7/9/90)

WAC 296-17-45003 Special construction industry rule. (1) Construction or erection operations. Each distinct type of construction or erection operation at a job site or location shall be assigned to the basic classification describing that operation provided separate payroll/time records are maintained for each such operation and which show in detail the name, rate of pay, and actual hours worked for each employee.

In the event payroll/time records are not maintained to support separate classification assignments the entire number of work hours in question shall be assigned to the highest rated classification which applies to the job site or location where the operation is being performed. The department may upon request by an employer (contractor) prior to the commencement of a contract authorize the use of a single basic classification to cover an entire project.

Selection of the basic classification will be determined by estimating the work hours for each construction operation at the site or location and calculating the premiums by each applicable classification—total estimated premiums will then be divided by the total estimated hours to produce an average rate. The basic classification assigned to the employer that carries the rate nearest to the estimated average rate will be selected provided that if the estimated average rate is equally between two classifications assigned to the employer the lower of the two rates will be selected.

Separate construction or erection classifications shall not be assigned to any operation which is within the scope of another basic classification assigned to such a job site or location. For example a carpenter employed by a concrete contractor to build foundation forms is to be assigned to a concrete construction classification and not a carpentry classification.

(2) Subcontracted work. The general contractor as defined in RCW 18.27.010, who subcontracts work out to others must ensure that such subcontractors are properly registered and licensed under chapter 18.27 or 19.28 RCW as applicable to avoid being held liable for industrial insurance premiums for such subcontractors (RCW 51.12.070). At the time of audit or within thirty days thereafter the general contractor or specialist contractor as the case may be who has subcontracted work out to others must provide the department's traveling auditors, agents or

assistants a list containing the names of such subcontractors, their contractors registration of license number, the expiration date of such registration or license, and their uniform business identifier or industrial insurance account number. Failure by the general contractor or specialist contractor to provide this record at the time of audit may result in a premium assessment being made for each subcontractor used by the general contractor or specialist contractor.

- (3) Debris removal. Work hours related to the removal of construction materials equipment or debris from a job site or location by employees of a general contractor or specialist contractor are to be assigned to the construction classification applicable to the phase of construction work being supported by such clean up personnel. However, if clean up personnel are involved in general job site or location clean up then risk classification 0510 or 0518 will apply as applicable to the job site or location. Employees of a specialist contractor engaged exclusively in debris removal services shall be assigned to risk classification 0510 or 0518 as applicable to the job site or location serviced.
- (4) Scaffolding, hoists, and towers. Work hours related to the installation, maintenance or removal of scaffolding, hod hoists, distributing towers, sidewalk bridges, and elevators by employees of a general contractor or specialist contractor are to be assigned to the construction classification applicable to the phase of construction being supported. However, if the scaffolding, hod hoists, distributing towers, sidewalk bridges and elevators being installed supports several phases of construction then risk classification 0510 or 0518 will apply as applicable to the jobsite or location. Employees of a specialist contractor engaged exclusively in work described in this subsection shall be assigned to risk classification 0510 or 0518 as applicable to the job site or location.
- (5) Preoccupancy clean up. Work hours related to preoccupancy clean up by employees of a general contractor or specialist contractor are to be assigned to classification 6602 "Janitors, N.O.C." provided that the term "preoccupancy clean up" for purposes of this rule is limited in scope to dusting, washing windows, vacuuming carpets, mopping floors, and cleaning fixtures. A division of individual work hours between classification 6602 and any construction, erection, or shop classification is not allowed. Employees having duties that fall within a construction classification and who are also engaged in preoccupancy clean up are to be reported in the applicable construction classification.
- (6) Shop or yard operations. Construction or erection contractors who maintain a permanent shop or yard operation may report the work hours of such employees in classification 5206, provided that this classification shall not apply to any yard or shop employee during any work shift in which the yard or shop employee has duties subject to another classification or if the classification assigned to the employer requires a separate treatment for shop operations.
- (7) Construction superintendent or project manager. Applies to construction superintendents or project managers applicable to both general and specialty contractors for construction or erection projects. Construction superintendents spend some time in an office and spend the remainder of time visiting various job sites to confer with construction foreman to keep track of the progress occurring at each construction site or project location. Project managers are

generally temporarily stationed at the construction site or project location and confined to a modular type of clerical office to schedule activities and arrival of supplies applicable to the job or project. Construction superintendents and project managers can be assigned classification 4900 provided such employees have no direct control over work crews and are not performing construction labor at the job site or project location. An employee performing superintendent or project manager duties and some type of construction labor or control over a work crew shall not be permitted a division of work hours between classification 4900 and any other construction classification, all work hours are to be reported in the applicable construction classification.

Mills: Shake and shingle - automated processes

For purposes of this ((subelassification)) classification, automated processes refers to shake and shingle mills equipped with automatic feeders on all saws, adjustable packing and cutting stations, and fully automatic systems for conveying material to work stations. All equipment must be equipped with automatic shut off switches. Within a shingle mill the operation of a trim saw must be performed by an individual as a separate function from that of the shingle saw operator (shingle sawyer is not to perform both functions). Shake splitters must be equipped with a gauge control mechanism which permits the operator to automatically set the thickness of the cut. Conveyor systems must have dual controls to allow the deckman and sawyer the ability to control incoming material to the work station.

Block mills must be equipped with an automated pallet dump to eliminate the handling of material to the sawyer work station or an adjustable scissor lift adjacent to the shingle saw or shake splitter. Blocked wood purchased by mills must be contained in pallets prior to entering the mill yard or premises. Log mills must be equipped with a fully mechanized log slip (used to move logs into the deck area), log levelers, stabilizers, and lifters must be present in the deck area, automatic deck cut-off saw, live deck for moving material from the deck to the splitting area and overhead mounted splitters. Trim saws, also referred to as clipper saws, must be equipped with a laser guide or quartz light. This lighting reveals to the operator where its saw blade is in relationship to the material being processed.

For purposes of this ((subclassification)) classification, the following terms or words shall be given the meanings below:

Automatic deck or cut-off saw - A large saw, usually circular, used to trim logs to a specified length (rounds) before they enter a manufacturing plant.

Clipper saw - A machine used to make shingle edges parallel.

Shingle - Roofing or siding material having sawn faces and backs, are of a standard thickness at the butt end and tapered finish at the other end.

Shake - Roofing or siding material having at least one surface with a natural grain textured split surface.

Live deck - A chain driven platform located in the same proximity as the deck saw and is used to convey cut rounds from the cutting area to the splitting area.

Log stabilizer - A levered device adjacent to the deck saw used to hold the log steady while it is being cut.

Log slip - A chain driven conveyor used to move logs into the deck area.

Laser or quartz guide light - An overhead mounted light above a saw that illuminates that portion of a work surface where the saw blade will pass or make a cut.

Log leveler - A levered device adjacent to the deck saw used to level a log automatically.

Overhead splitter - A ceiling mounted hydraulic, air or electrically operated apparatus with wedge shaped end that is used to split log rounds into block wood when activated by the splitterman.

Shingle saw - A machine used to make shingles.

Shake splitter - A machine used to split blocks into shake blanks.

Shake saw - A machine used to saw shake blanks into a finished wedged shape product.

Shake and shingle mills not meeting all the conditions as set forth above shall be separately classified in classification 1005 "Shake and shingle mills, N.O.C."

AMENDATORY SECTION (Amending WSR 90-13-018, filed 6/8/90, effective 7/9/90)

WAC 296-17-870 Evaluation of actual losses. Except as provided in the following subsections of this paragraph, actual losses shall include all payments as of the "valuation date" for each claim arising from an accident occurring during the experience period. Losses for claims open as of the valuation date may also include a reserve for future payments. Actual losses on claims for accidents occurring outside of the experience period shall not be included.

- (1) Valuation date. The valuation date shall be on and include December 31, one year and one day immediately preceding the effective date of premium rates as set forth in WAC 296-17-895. For experience modifications effective January 1, 1990, and thereafter, the valuation date shall be June 1, seven months immediately preceding the effective date of premium rates.
- (2) Retroactive adjustments revision of losses between valuation dates. No claim value shall be revised between valuation dates and no retroactive adjustment of an experience modification shall be made because of disputation concerning the judgment of the claims examiner or because of subsequent developments except as specifically provided in the following cases:
- (a) In cases where loss values are included or excluded through mistake other than error of judgment.
- (b) In cases where a third party recovery is made, subject to subsection (4)(a) of this section.
- (c) In cases where the claim qualifies as a second injury claim under the provisions of RCW 51.16.120.
- (d) In cases where a claim, which was previously evaluated as a compensable claim, is closed and is determined to be noncompensable (ineligible for benefits other than medical treatment).
- (e) In cases where a claim is closed and is determined to be ineligible for any benefits.

In the above specified cases retroactive adjustment of the experience modification shall be made for each rating in which the claim was included. Retroactive adjustments will not be made for rating periods more than ten years prior to the date on which the claim status was changed.

(3) Average death value. Each fatality occurring to a worker included within the mandatory or elective coverage of Title 51 RCW shall be assigned the "average death value," said value to be the average incurred cost for all such fatalities occurring during the experience period. The average death value is set forth in Table II.

- (4) Third-party recovery effect on experience modification. ((In the event of a third party recovery on a elaim, the employer shall be charged for a portion of the actual loss amount, gross of such recovery, established on the claim for each year in which the claim's injury date falls within the experience period (see WAC 296-17-850). This portion shall be calculated at the time the recovery is made, and shall be determined by taking the ratio of the total cost of the claim, including attorneys' fees, after recovery, to the total cost of the claim-before recovery. If the claim-is open at the time the recovery is made, then costs before and after recovery may include an allowance for future claim payments. Both the primary and excess components of the actual loss amount shall be reduced in the same proportion.)) (a) For claims with injury dates prior to July 1, 1994, a potential claim cost recovery from action against a third party, either by the injured worker or by the department, shall not be considered in the evaluation of actual losses until such time as the third-party action has been completed. If a third-party recovery is made after a claim had previously been used in an experience modification calculation, the experience modification shall be retroactively adjusted. The department shall compute a percentage recovery by dividing the current valuation of the claim into the amount recovered or recoverable as of the recovery date, and shall reduce both primary and excess losses previously used in the experience modification calculation by that percentage.
- (b) For claims with injury dates on or after July 1, 1994, if the department determines that there is a reasonable potential of recovery from an action against a third party, both primary and excess values of the claim shall be reduced by fifty percent for purposes of experience modification calculation, until such time as the third-party action has ben completed. This calculation shall not be retroactively adjusted, regardless of the final outcome of the third-party action. After a third-party recovery is made, the actual percentage recovery shall be applied to future experience modification calculations.
- (c) For third-party actions completed before July 1, 1996, the claim shall be credited with the department's net share of the recovery, after deducting attorney fees and costs. For third-party actions completed on or after July 1, 1996, the claim shall be credited with the department's gross share of the recovery, before deducting attorney fees and costs.
 - (d) Definitions:
- (i) As used in this section, "recovery date" means the date the money is received at the department or the date the order confirming the distribution of the recovery becomes final, whichever comes first.
- (ii) As used in this section, "recoverable" means any amount due as of the recovery date and/or any amount available to offset case reserved future benefits.
- (5) Second injury claims. The primary and excess values of any claim which becomes eligible for second injury relief under the provisions of RCW 51.16.120, as now or hereafter amended, shall be reduced by the percentage of relief granted.
- (6) Occupational disease claims. When a claim results from an employee's exposure to an occupational disease hazard, the "date of injury," for the purposes of experience rating, shall be the date on which the disability was diagnosed, giving rise to the filing of a claim for benefits. The

cost of any occupational disease claim, paid from the accident fund and medical aid fund and arising from exposure to the disease hazard under two or more employers, shall be prorated to each period of employment involving exposure to the hazard. Each insured employer who had employed the claimant during the experience period, and for at least ten percent of the claimant's exposure to the hazard, shall be charged for his share of the claim based upon the prorated costs.

(7) Maximum claim value. No claim shall enter an employer's experience record at a value greater than the "maximum claim value." The maximum claim value is set forth in Table II.

AMENDATORY SECTION (Amending WSR 95-06-069, filed 3/1/95, effective 4/10/95)

WAC 296-17-915 Evaluation of incurred losses dividend and retrospective rating plans. The initial evaluation date for each claim arising from incidents occurring during the coverage period shall be approximately twelve months following the end of the coverage period. Each subsequent annual incurred loss evaluation under the retrospective rating plan shall be approximately twelve months following the preceding evaluation date.

The estimated cost of each claim shall include all payments made as of the valuation date and may also include a reserve for future payments. The claim cost for any one claim or group of claims arising from a single accident shall be limited to a maximum of \$500,000.

For claims with injury dates prior to July 1, 1996, a potential claim cost recovery from action against a third party, either by the injured worker or by the department, shall not be considered in the evaluation of incurred losses until such time as the third-party action has been completed. For claims with injury dates after July 1, 1996, if the department determines that there is a reasonable potential of recovery from an action against a third party, the incurred loss shall be reduced by fifty percent during the period of time that the third-party action is pending. Regardless of the final outcome of the third-party action, the incurred loss will not be reevaluated after the final retrospective rating adjustment.

For a third-party action completed before the final adjustment, the claim shall be credited with the department's net share of the recovery, after deducting attorney fees, if the action is completed prior to July 1, 1996. If a third-party action is completed on or after July 1, 1996, the claim shall be credited with the department's gross share of the recovery, before deducting attorney fees.

- (1) Protect the state's natural resources;
- (2) Provide for safe marine transportation in state waters: and
- (3) Determine whether cargo and passenger vessels entering or operating in state waters pose a substantial risk of harm to the public health and safety and to the environment.

NEW SECTION

WAC 317-31-020 Application. Owners and operators of cargo and passenger vessels entering or operating in state waters shall comply with the provisions of this chapter.

PART 1 VESSEL SCREENING

NEW SECTION

WAC 317-31-100 Vessel screening. (1) The office may screen any cargo or passenger vessel, except fishing vessels and vessels subject to chapter 317-21 WAC, entering or operating in state waters to determine a vessel's potential risk based on vessel information collected by the office. The office may collect information from any source, including the owner and operator, other public agencies, or by inspection. A vessel's potential risk is based on vessel information relating to factors that are risk predictors and that include, but are not limited to:

- (a) Vessel age;
- (b) Vessel type;
- (c) Redundancy of mechanical, navigational, and electrical generation systems;
 - (d) Country of registry (flag);
 - (e) Classification society;
 - (f) Owner;
- (g) Presence of a state-licensed pilot while in state waters;
- (h) Changes in ownership, country of registry, or classification society;
- (i) History of violations of international, federal, and state laws and regulations;
 - (j) History of marine casualties; and
 - (k) Key personnel history.
- (2) The risk factors are arranged in a matrix and assigned a risk weight according to a factor's impact on safe marine transportation. The greater impact a factor has results in a higher risk weight. Risk weights are based on opinions of expert mariners experienced in marine transportation in state waters and data supplied by the office's vessel boarding program. Vessel information is evaluated through the matrix to calculate a vessel's potential risk.

NEW SECTION

WAC 317-31-110 Advance notice of entry. (1) A cargo or passenger vessel owner or operator shall submit a notice of entry to the office by telefax or telephone at least twenty-four hours before the vessel enters state waters. - (5) Vessels that submit an advance notice of arrival containing all the information required under subsections (2) and (3) of this section to the U.S. Coast Guard, directly or through the Canada/United States Cooperative Vessel Traffic Service (CVTS), need not provide the notice to the office otherwise required by subsection (1) of this section. However, safety reports required by WAC 317-31-130 or 317-31-140 must be submitted to the office.

NEW SECTION

WAC 317-31-120 Intrastate operation. (1) If a cargo or passenger vessel is underway more than fifty percent of the time in state waters in a calendar year, the vessel's owner or operator shall submit to the office a written schedule of the vessel's typical operations before operating the vessel in state waters.

NEW SECTION

WAC 317-31-250 Inspections. (1) Vessel inspectors may board and inspect a cargo or passenger vessel during the vessel's scheduled stay in port that poses a high potential risk under WAC 317-31-100. Vessel inspectors may also board and inspect cargo or passenger vessels the office has reason to believe may pose a substantial risk, or if the office does not have sufficient information to determine potential risk under WAC 317-30-100. The owner or operator shall make the vessel available for inspection on request by the office.

- (2) The office may seek more information concerning the vessel from the U.S. Coast Guard or the owner or operator of the vessel, prior to or in lieu of performing an inspection of the vessel.

WSR 96-12-070 DEPARTMENT OF ECOLOGY

[Filed June 4, 1996, 10:42 a.m.]

The Department of Ecology air quality program is looking into the feasibility of consolidating, reorganizing and rewriting its air quality regulations. The air quality program is taking on this project because clear, well-organized regulations will help the regulated community voluntarily comply and should lead to greater consistency in implementation.

The air quality program is seeking input from all stakeholders and end users. Please take the time to think about, and answer, the following questions:

What problems do you have understanding air quality regulation (anecdotal information is fine)?

Do you know of existing conflicts or duplications in air quality regulations?

What options do you envision for clarifying air regulations (i.e., cataloguing, guidance, simple fixes, total reorganization)?

Input that includes specific citations will be the most helpful in assisting with this project.

The air quality program will continue to seek input throughout the project, which is projected to take about one year. At the end of that year (April 1997), the project coordinator will make a recommendation to air quality program management. That recommendation could range from leaving the regulations as they are to making minor clarification changes to reorganizing and rewriting all air quality regulations.

If there is a decision to make any changes in the regulations, the air quality program will use the same rule development process that is now used in the Department of Ecology, which includes inter- and intra-agency coordination, public involvement and compliance with laws of the state of Washington.

Paige Boulé is the coordinator and prime contact for this project. She can be reached at (360) 407-7026, FAX (360) 407-6802, Paige Boulé, Department of Ecology, P.O. Box 47600, Olympia, WA 98504-7600.

WSR 96-12-097 DEPARTMENT OF ECOLOGY

[Filed June 5, 1996, 2:33 p.m.]

The United States Environmental Protection Agency and the Washington Department of Ecology for over two decades have shared a mutual mission to protect, preserve and enhance Washington's environment, and promote the wise management of the air, land and water for the benefit of current and future generations. During that time we have carried out our missions in the context of a traditional federal-state relationship.

The state of Washington and the United States Environmental Protection Agency, Region 10, are proposing a new environmental partnership that encourages collaboration and cooperation. The new partnership would reduce the Environmental Protection Agency oversight while providing ecology with more flexibility in how the state meets federal standards and manages federal assistance funds.

This new partnership is described in a written performance partnership agreement jointly developed by our two agencies. The agreement identifies mutual priority strategic goals as well as activities the two agencies would undertake during the state fiscal year (July 1, 1996 - June 30, 1997) in the areas listed below. This agreement would also serve as the only work plan for most of the Environmental Protection Agency grant programs in the air, water, ecosystems and Resource Conservation and Recovery Act programs.

Air Quality
Resource Conservation and Recovery Act (RCRA)
Surface and Ground Water Quality Management
Watershed and Aquatic Habitat Protection
Enforcement and Compliance
Environmental Indicators

This written agreement will be available on June 21 for public review and comment. If you are interested in receiving a copy of the performance partnership agreement, please provide your full name and address to John Shores, EPA Region 10, EPA Public Information Center, 1200 Sixth Avenue, Seattle, WA 98101, phone (206) 553-1200, FAX (206) 553-0149, email shores.john@epamail.epa.gov.

The agreement will also be available on the Environmental Protection Agency and ecology's web sites after June 21.

- The ecology address is http://www.wa.gov/ecology.

Please direct questions and written comments by July 22, 1996, to Judith Leckrone, United States Environmental Protection Agency, Region 10 (ECO-088), 1200 Sixth Avenue, Seattle, WA 98122, phone (206) 553-6911, FAX (206) 553-6984, email leckrone.judith@epamail.epa.gov.
